Computer Science 1313  
Spring 2010  
(9:30 – 10:20 am, M,W,F; SEC A235)

Instructor  
Sudarshan Dhall, 231 DEH, sdhall@ou.edu, 325-4042

Office Hours  
300 – 430 pm, M and W.

Teaching Assistants  
Carlos Sanchez: maletas@ou.edu  
Syed Huq: maruf@ou.edu

Laboratory Times and Locations  
Lab 011 10.30 - 11:20 on Fridays (CEC 206)  
Lab 012 12.00 - 12:50 on Fridays (CEC 206)  
Lab 013 01.00 - 01:50 on Fridays (CEC 206)  
Lab 014 02.00 - 02:50 on Fridays (CEC 206)

Prerequisites  
Math 1523 or equivalent.

Textbook and other material  
3. Recommended: Working laptop computer with a wireless network card and ample battery capacity for an hour laboratory without plugging into an outlet.

Topics  
Plan to cover the first eight chapters. Time permitting, we will go over some topics from chapters 9 and 10.

Class Attendance  
Class attendance is important because we will discuss concepts and examples that are not in the textbook. You are responsible for everything that is announced in class, independently of whether you choose to attend or not. There is a direct correlation between passing this class and attending classes and labs.

Laboratory Attendance  
During the laboratory, students will be able to work in pairs and sometimes required to work in small groups. Students who do not attend laboratory will not get credit for these assignments. Lab attendance is MANDATORY. A sign up sheet will be passed every class session and your attendance will be monitored. 5% of your final grade will be based on your attendance and participation.

Class Home Page  
This class will use Desire2Learn software for our home page. The URL for the home page is http://learn.ou.edu.
Login with your 4+4 (first four letters of your last name followed by the last four digits of your student number), using your standard OU password. If you have difficulty logging in, call 325-HELP. This software provides a number of useful features, including a list of assignments and announcements, an electronic mailing list, newsgroups, and grade book. The TAs and I update this website several times a week. You should check the site daily. You are responsible for things posted on the site with a 24 hour delay.

Class Email Alias:
Urgent announcements will be sent through email. It is your responsibility to

- Have your university supplied email account forwarded to the location where you read email.
- Make sure that your email address on the course homepage is correct, and forwards email to the place where you read it. I’ll send out a test message during the first week of class. If you do not receive this message, it is your responsibility to get the problem resolved.
- Have your email program set up so that replying to your email will work correctly. You can send email to yourself and reply to yourself to test this. If you need assistance in accomplishing any of these tasks, contact 325-HELP.

Examinations:
Mid-term examinations: There will be two midterm examinations and a final examination. During examinations students must sit in assigned seats. Missing an examination without a previously approved excuse will result in a grade of zero for that examination.

Final Examination: The final is comprehensive, as required by College of Engineering policy. No final examinations can be given early, except as required by University policy.

Academic Misconduct:
All work submitted for an individual grade, such as homework, should be the work of that single individual: not their friends, the TAs, nor their tutor. Do not show another student a copy of your homework before the submission deadline. The penalties for permitting your work to be copied are the same as the penalties for copying someone else’s work. If you choose to do your work on your computer, make sure that your computer account is properly protected. Use a good password, and do not give your friends access to your account or your computer system. Do not leave printouts, or thumb drives around a laboratory where others might access them. Upon the first documented occurrence of collaborative work, the academic misconduct will be reported to the Campus Judicial Coordinator. The procedure to be
followed is documented in the University of Oklahoma Academic Misconduct Code (http://www.ou.edu/studentcode). In the event that I elect to admonish the student, the appeals process is described in http://www.ou.edu/provost/integrity-rights/.

Incompletes:
The grade of I is intended for the rare circumstance when a student who has been successful in a class has an unexpected event occur shortly before the end of the class. I will not consider giving a student a grade of I unless the following three conditions have been met.

1. It is within two weeks of the end of the semester.
2. The student has a grade of C or better in the class.
3. The reason that the student cannot complete the class is properly documented and compelling.

Accommodation of Disabilities:
The University of Oklahoma is committed to providing reasonable accommodation for all students with disabilities. Students with disabilities who require accommodations in this course are requested to speak with the professor as early in the semester as possible. Students with disabilities must be registered with the Office of Disability Services prior to receiving accommodations in this course. The Office of Disability Services is located in Goddard Health Center, Suite 166, phone 405/325-3852 or TDD only 405/325-4173.

Classroom Conduct:
Disruptions of class will not be permitted. Examples of disruptive behavior include:

- Allowing a cell phone or pager to repeatedly beep audibly.
- Playing music or computer games during class in such a way that they are visible or audible to other class members.
- Exhibiting erratic or irrational behavior.
- Behavior that distracts the class from the subject matter or discussion.
- Making physical or verbal threats to a faculty member, teaching assistant, or class member.
- Refusal to comply with faculty direction.

In the case of disruptive behavior, I may ask the concerned student to leave the classroom and may charge him/her with a violation of the Student Code of Responsibilities and Conduct.

Projects, Homework, Quizzes, and Attendance:

Programming Language: We will be using the C language.
Sharing Resources: It is common for office hours and laboratory sessions to become very busy immediately before a project or homework assignment is due. While the TAs and I will make reasonable efforts to meet the needs of as many students as possible, it is often impossible to fully meet the needs of all students during this busy period of time. For example, if there are ten students in my office during a given hour, each student could expect to receive about six minutes of help. This limited amount of help may not be sufficient.

Projects: Incomplete projects may be turned in for partial credit. Projects which do not compile will generally receive no credit. Beyond the first two projects, projects that do not execute will generally receive no credit.

Software Tools: For those students with a laptop computer, I recommend that you use CodeBlocks in this class. Using commercial software without proper licensing is illegal, unethical, and absolutely unacceptable in this class. In addition, an account in the OU engineering network will be created for each student to work in the different homework assignments.

Project Strategy: The grades for projects are determined by how well the material presented meets the objectives stated on the project handout. If you have to turn in an incomplete project, the way to maximize the points received is to meet as many objectives as possible. One effective strategy is to meet objectives one at a time. If you save a copy of our current project to a separate directory when an objective is met, this can prevent many problems.

Project Submission: Projects are due by 11:59 p.m. on the selected due date by uploading the project files to the digital dropbox on the course home page for your lab section (not the lecture section where most of the course documents are located). Late projects are not accepted. Do not wait for the last minute to submit a project.

Project Groups: Most lab time will be spent working in pairs or groups. Students who do not attend laboratory will not get credit for their pair or group’s work.

Short Programming Assignments: Please note that each CodeLab assignment consists of MULTIPLE EXERCISES. To find out which ones are coming due shortly, SORT THE EXERCISES BY DEADLINE.

To Register with CodeLab:
1) Go to http://www.tcgol.com --OR-- www.tcg02.com
2) Click "Register for CodeLab"
3) Choose "I am a student in a course ..." and click CONTINUE
4) Enter the Section Access Code: OKLAHO-7598-0 and click CONTINUE
5) Continue filling out the forms being careful to enter a VALID email address and first and last names (these will appear in the professor's roster)

**LOGIN:**
1) Go to [http://www.tcgo1.com](http://www.tcgo1.com) --OR-- [www.tcgo2.com](http://www.tcgo2.com)
2) Click "Login to CodeLab". The username is the email address given during registration. The password is the password selected during registration.

**Backup Copies of Projects:** It is the students’ responsibility to backup their files appropriately. No extensions to deadlines will be given as a result of lost files, unless there is a massive, network wide problem which affects the entire class. Do not rely on anyone else to backup your important files. It is particularly important to save a backup copy of any project that is submitted. This backup version should not be opened or edited after submission in case something goes wrong with the submission.

**Homework Submission:** Homework needs submitted before the beginning of class when it is due. Class time should not be used to complete homework assignments. I strongly recommend you to submit the homework online in the digital drop box of your lab session.

### 5.0 Evaluation

**Grading Questions on Homework, and Projects:** All disagreements about the grading of projects or homework must be brought to the attention of the instructor within one week of when the item was first returned to students.

**Examination Grading Questions:** If there is a dispute about the grading of an examination problem, you may stay after class the day the tests are returned to discuss it. If you cannot stay at this time, return the paper to me and stop by during my office hours. Once a test has been removed from the classroom after it has been returned, the grade is final and will not be changed, even if it is found to be in error.

**Desire2Learn Grade Summary:** Desire2Learn has a grade book that is used to store the raw data that is used to calculate your course grade. It is the responsibility of each student in this class to check their grades on Desire2Learn after each project or homework is returned. If an error is found, bring the grading document to me or the TA, and we will correct it. The grade book does not understand how grades are actually calculated in this class. It therefore may show things like percentages and total points that are incorrect. The correct formulas for calculating grades are given in this document.

**Grading:** There are 6 components to the course grade. They are weighted as follows.

- **Component Percent**
  - First Midterm 15
  - Second Midterm 15
  - Homeworks / Projects / Quizzes / Attendance 35
  - CodeLab 10
  - Final Exam 25
Failure to do the homeworks and projects usually results in failure in the course. The grading scale will be no higher than the following. It may be lower at the discretion of the instructor.

**Grade Percentage**
A 90+
B 80-89
C 70-79
D 60-69
F Otherwise
