General Information

Class Time: Tuesday and Thursday 3:00pm - 4:15pm
Class Location: Dale Hall, 0211
Prerequisites: CS 1323 and Mathematics 1823 (*)

Instructor and Office Hours:

</table>

(*) You are expected to have a working knowledge of Java, including a familiarity with its basic data types and control structures, and an understanding of basic program abstraction and organization. If you do not have a solid understanding of these skills, then you need to revisit the material from CS 1323 before attempting this course.

Text and Course Materials

1. Books

       i. Book code: OUCS2334JabrzemskiSpring2018
       ii. A subscription is $58 and will last until May 28, 2018. Students will be able to subscribe until Apr 28, 2018.
       iii. When you create your Zyante account, please use your permanent OU email address (the one with your full name, not your alias). We will otherwise be unable to match your Zyante grades with your Canvas identity.

   (b) A Gift of Fire: Social, Legal, and Ethical Issues for Computing and the Internet, Sara Baase, Fourth Edition (GOF)
2. We are using Top Hat as an interactive classroom tool during the semester. This tool interfaces to your laptop and your cell phone (smart or not). All students are required to sign up for the Top Hat service ($26 for the semester for all classes; $38 for 12 months of access or $75 for your academic career). Those enrolled in the class will receive an email invitation to join our Top Hat class (please wait for this email).

Note that just having the Java Runtime Environment (JRE) is not sufficient (which you may have installed for previous classes).

4. We will use Eclipse as our integrated development environment (IDE) this semester. If you install the Java SDK before Eclipse, the installation process usually goes smoothly. We strongly recommend the Oxygen version (Version 4.7) [https://www.eclipse.org](https://www.eclipse.org)

5. We will use a Web-Cat for all program submission and assessment. Instructions for installing the Web-Cat plugin for Eclipse and how to use the service can be found on our Web-Cat page. See and follow the installation instructions for Web-Cat’s plugin for Eclipse

6. It is the responsibility of each student in this class to have a working laptop computer with ample battery (at least 2 hours of life under moderate usage) and wireless Internet connectivity. You must bring the laptop computer to the first week of class and to all labs (you will find the laptop useful for many of the remaining classes, too). If your computer requires repair during the semester, it is your responsibility to make arrangements to have another computer available and to get the necessary software installed. Note that temporarily borrowing a computer from a fellow student in the class can present a number of problems, including the potential for academic misconduct.

3.1 Ownership of Course Materials

The instructor retains ownership and all rights to original content. This includes but is not limited to exams, lectures, quizzes, handouts, protocols, electronic documents, syllabi, and all other materials. Original or transcribed course content may not be copied, recorded, retransmitted, posted on-line, or sold without the expressed written consent of the instructor. Violation of content ownership will be treated as academic misconduct.

Course Description

This is your second course in programming. We will focus on abstraction and programming methodologies including: inheritance, abstract data types, integrated development environments, unit tests, test driven development, and ethics.

Course Goals

By the end of this course, you should be able to:

- Analyze simple computing problems and define the requirements that are appropriate to their solution.
- Apply design and development principles to the implementation of a solution to the computing problems. Specifically, implement a program in Java using abstract data types and objects.
- Demonstrate sophisticated use of objects, inheritance, polymorphism, and generics in Java programming.
• Evaluate and analyze the correctness of your implementations, and use this information to make further implementation changes.

• Use an integrated development and debugging environment, including unit tests.

• Evaluate and analyze the professional, ethical, legal, security and social issues that are faced by computer scientists, specifically in the areas of intellectual property rights and privacy.

5.1 ABET Student Outcomes

B: An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

C: An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs

E: An understanding of professional, ethical, legal, security, and social issues and responsibilities.

K: An ability to apply design and development principles in the construction of software systems of varying complexity

Course Expectations and Policies

6.1 Class Home Page

This class will use Canvas software for our home page. The URL for the home page is https://canvas.ou.edu. Login with your 4+4 using your standard OU password. If you have difficulty logging in, call 325-HELP. This software provides a number of useful features, including a list of assignments and announcements, an electronic mailing list, newsgroups, and grade book. I will use this web site for all updates. I may update the Canvas page several times a week. When I update the site in any significant way, I will post an announcement on Canvas telling you what has been added and where it is located. You are responsible for things posted on the site within 48 hours of the post.

Note that you can configure Canvas to send you email whenever a new piece of information is posted. You should check the site regularly.

6.2 Class Attendance

You are expected to attend all of the lectures and the labs in which you are enrolled. Class attendance is important because we will discuss/clarify concepts and examples that are may not be in the text book. You are responsible for everything that is announced in class, independent of whether you choose to attend or not. In class students may be required to work in small groups. Additionally, graded quizzes will be given in class using TopHat and Canvas. Students who do not attend will not get credit for quizzes or group assignments.

6.3 Class Email

Urgent announcements will be sent through Canvas email. It is your responsibility to:

• Regular read your university supplied e-mail or have it forwarded to a location where you do regularly read e-mail. I will send out a test message during the first week of class. If you do not receive this message, it is your responsibility to get the problem resolved.

• Have your email program set up so that replying to your email will work correctly. You can send email to yourself and reply to yourself to test this. If you need assistance in accomplishing any of these tasks, contact 325-HELP. You are responsible for reading emails within 24 hours.
Learning Activities and Assessment

7.1 Readings/Homework

You are responsible for the assigned material found in your textbooks before the class session for which the reading is assigned. The Zyante exercises contained in the assigned sections are due before class on assigned day (see the schedule in Canvas).

7.2 Quizzes

The quizzes will consist of questions about the material from required reading material and discussions, and previous homework questions.

7.3 Projects

Five 2-week long projects will be given over the course of the semester. Some of these projects will be individual, and some will be done in groups of two. These groups will be assigned after a few weeks of the semester. Group members are expected to contribute approximately equally to each project solution.

7.4 Web-cat

Lab and project assignments will be submitted for grading to a system called Web-Cat. Once you have submitted your assignment, you will automatically receive a partial assessment of your submission. A limited number of re-submissions is allowed until the lab/project deadline. After the deadline, you will receive further feedback on your submission. See the Web-Cat installation/use details.

7.5 Examinations

There will be two midterm and one final examination. The dates are given in the class schedule. During examinations, students are expected to sit in assigned seats. Missing an examination without a previously approved excuse will result in a grade of zero for that examination.

Missing an examination without a previously approved excuse will result in a grade of zero for that examination. If an examination is missed for a verifiable, documented, and approved reason the percentage of the grade coming from the final examination will be adjusted to compensate. Makeup examinations are never available, except as required by University policy.

7.6 Final Examination

The final is comprehensive, as required by College of Engineering policy. No final examinations can be given early, except as required by University policy.

7.7 Examination Grading Questions

If there is a dispute about the grading of an examination problem, you may stay after class the day the tests are returned to discuss it. If you cannot stay at this time, return the paper to me and stop by during my office hours. Once a test has been removed from the classroom after it has been returned, the grade is final and will not be changed, even if it is found to be in error.

- Projects/Labs: Grading questions for projects/labs that are graded by the TA should first be brought to the same TA. If this does not resolve your question, please see the instructor.
• Exams: All grading questions must be addressed within one week of the graded exam being returned.

• Others: All other grading questions may be brought to the instructor.

• Please note that when an exam/assignment is brought with grading questions, we may examine the entire exam/assignment and your final grade may end up lower. All disagreements about scores must be brought to our attention within one week of when the item is returned.

7.8 Final Grade
The course grade will be determined by the average of the quizzes, discussions, and Final Exam. The final letter grading for the course will be as follows: A ≥ 90%, B = 89-80%, C = 79-70%, D = 69-60%, F = < 60%. The instructor will round all averages to two significant figures (69.5 will round to 70 and 69.4 will round to 69) to determine the student’s letter grade in the course (70 = C, 69 = D). There is no curve in this course. The instructor reserves the right to make linear adjustments to quiz and final exam grades in cases were a quiz or exam question was found to be in error or unreasonably difficult.

7.9 Canvas Grade Summary
Canvas has a grade book that is used to store the raw data that is used to calculate your course grade. It is the responsibility of each student in this class to check their grades on Canvas after each project or homework is returned. If an error is found, bring the grading document to me, and I will correct it.

7.10 Top Hat Grade Summary
Top Hat has its own grade book for tracking in-class exercise participation and performance. These grades will be transferred to Canvas.

7.11 Course Grade
There are 5 components to the course grade. They are weighted as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percent of Final Grade</th>
<th>Number Tools</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>quizzes and in-class Assignments</td>
<td>11%</td>
<td>TBD</td>
<td>Top Hat</td>
</tr>
<tr>
<td>Grade for this category is: Max(In-Class Exercises (keep N-1), Exam Average)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>homework</td>
<td>10%</td>
<td>TBD</td>
<td>Zyante</td>
</tr>
<tr>
<td>laboratory</td>
<td>14%</td>
<td>turn it in with Web-Cat</td>
<td>Keep N-1</td>
</tr>
<tr>
<td>projects</td>
<td>25%</td>
<td>5</td>
<td>Eclipse; turn it in with Web-Cat</td>
</tr>
<tr>
<td>midterm exams</td>
<td>20%</td>
<td>2</td>
<td>Paper</td>
</tr>
<tr>
<td>final exam</td>
<td>20%</td>
<td>1</td>
<td>Paper</td>
</tr>
</tbody>
</table>

7.12 Incompletes
The grade of "I" is intended for the rare circumstance when a student who has been successful in a class has an unexpected event occur shortly before the end of the class. I will not consider giving a student a grade of "I" unless the following three conditions have been met:

• It is within two weeks of the end of the semester.
• The student has a grade of C or better in the class.
• The reason that the student cannot complete the class is properly documented and compelling.

Course Coverage and Procedures

8.1 Teamwork Issues
The workloads of teams are expected to be evenly distributed among the members. One will risk losing all or part of the project grade if he does not make a fair contribution.

8.2 Material Covered
Most or all chapters in Zybooks will be covered starting with Chapter 7 and several chapters from GoF (including chapter 2 and 4)

8.3 Backup Copies of Projects
It is the student responsibility to backup their files appropriately. No extensions to deadlines will be given as a result of lost files, unless there is a massive, network wide problem that affects the entire class. Do not rely on anyone else to backup your important files. Configure OneDrive that is a part of your Office365 to make backing up your work a routine part of computer usage. It is particularly important to save a backup copy of any project that is submitted. This backup version should not be opened or edited after submission in case something goes wrong with the submission system.

Course Policies

9.1 Make-up Policy
Although the Instructor does not expect a student to miss an assignment, if a student does miss an assignment for a legitimate, verifiable reason, the Instructor will work with the student to provide an opportunity for make-up work.

9.2 Absences
Attending every lecture is highly recommended and expected. Not attending class will have an indirect negative effect on your grade. If low attendance to lectures becomes problematic, the instructor reserves the right to use attendance as extra-credit. There will not be assigned seating in the lecture, but students are expected to sit next to their study group partners to facilitate communication during problem solving sessions in class.

9.3 Civility
All students are expected to follow proper classroom behavior and treat other students and the instructor with respect. If the instructor deems a student’s actions or behavior disruptive to the class, the students will be asked to leave the class for that day.

9.4 Emergency Contact
In case of family or medical emergencies, students should send an e-mail (rjabrzemski@ou.edu). Once the emergency has passed, the student can meet with the instructor to discuss what material/assignments the student has missed and what steps would beneficial to aid the student in continued success in the course.
9.5 Changes in the Syllabus

As the course develops, it might be desirable/necessary to make appropriate changes in aspects of this syllabus. The Instructor reserves the right to make changes if desirable or necessary.

University Policies

10.1 Academic Misconduct

All work submitted for an individual grade, such as quizzes, should be the work of that single individual: not their friends or tutor. **Please ask me if you are in doubt before you collaborate with others. You have to work individually unless it is stated that a collaboration is allowed.**

- Do not show another student a copy of your homework or individual projects before the submission deadline. The penalties for permitting your work to be copied are the same as the penalties for copying someone else work.

- If you choose to do your work on your computer, make sure that your computer account is properly protected. Use a good password, and do not give your friends access to your account or your computer system. Do not leave printouts, or thumb drives around a laboratory where others might access them.

- Upon the first documented occurrence of collaborative work, I will report the academic misconduct to the Campus Judicial Coordinator. The procedure to be followed is documented in the University of Oklahoma Academic Misconduct Code ([http://integrity.ou.edu/summary_of_the_process.html](http://integrity.ou.edu/summary_of_the_process.html)). In the unlikely event that I elect to admonish the student, the appeals process is described in [http://www.ou.edu/provost/integrity-rights/](http://www.ou.edu/provost/integrity-rights/).

- If you work with anyone else in completing an assignment, you must include that person’s name on the submitted work. Failure to list a student you worked with on the assignment is a violation of academic integrity. If I find that the submitted work appears to be plagiarized, all students involved will be invited to my office individually to explain the work and/or perform similar work. The instructor will determine whether plagiarism occurred based on the match between the depth of understanding of the material displayed in the assignment and the individual interviews. [See [http://integrity.ou.edu/faculty_guide.html](http://integrity.ou.edu/faculty_guide.html)]

- For Top-Hat, it is considered cheating to submit answers to quiz questions when you are not present in class.

- Programming projects will be checked by software designed to detect collaboration. This software is extremely effective and has withstood repeated reviews by the campus judicial processes.

- Tutors can be an excellent source of support for students who are having difficulty in the class, but only if the tutor is aware of the distinction between teaching students the material so that they can do their own work, and doing work for students. Tutors who do work for students are not only failing to help the students learn, they are abetting academic misconduct. Examples of misconduct include: If your tutor is sitting behind you while you are typing and methodically telling you what to enter, he or she is abetting academic misconduct. If you tutor is emailing files containing partial or complete programming projects to you, you will commit academic misconduct if you use those lines in your program. A more effective use of tutoring services is to do problems that are similar to the assigned work, instead of doing assigned work. For example, it would be fine to work unassigned problems from the textbook with a tutor. This requires significant discipline, both on the part of the tutor and the part of the student. Copying from a tutor is as unacceptable as copying from another student. If your tutor doesn’t know how to teach properly, please ask them to call or visit me and I will provide training and guidance. If you are tutoring someone else in the class, you can be accused of academic misconduct if this person copies your work.
• Cheating is strictly prohibited at the University of Oklahoma, because it devalues the degree you are working hard to get. As a member of the OU community it is your responsibility to protect your educational investment by knowing and following the rules. For specific definitions on what constitutes cheating, review the Student’s Guide to Academic Integrity at http://integrity.ou.edu/students_guide.html.

To be successful in this class, all work on exams and quizzes must be yours and yours alone. You may not receive outside help. On examinations and quizzes you will be informed about permissible study aids. Should you see someone else engaging in this behavior, I encourage you to report it to myself. That student is devaluing not only their degree, but yours, too. Be aware that it is my professional obligation to report academic misconduct, which I will not hesitate to do. Sanctions for academic misconduct can include expulsion from the University and an F in this course, so don’t cheat. It’s simply not worth it.

• Feel free to discuss all assignments with the instructor or the TAs. However, do not discuss, look at, or copy another student’s solution to a Zyante, Top Hat or lab assignment. Doing so is considered cheating. For group projects, communication is expected between group members. However, communication about the solution to a project between groups is disallowed. Doing so is considered cheating.

• You may make use of the net as a reference as you are working on assignments. For projects, these references must be explicitly documented in your code. However, downloading or deriving specific solutions from the net is considered cheating.

10.2 Code Sharing for Group Projects
If you are keeping your code on GitHub, you have to keep your code in private repositories.

10.3 Religious Observance
It is the policy of the University to excuse the absences of students that result from religious observances and to reschedule examinations and additional required classwork that may fall on religious holidays, without penalty. [See Faculty Handbook 3.15.2 (https://apps.hr.ou.edu/FacultyHandbook#3.15.2)].

10.4 Reasonable Accommodation Policy
There is not specific language for the Reasonable Accommodation policy to be included in the syllabus. It is good to become familiar with the policy and describe it in your own words. Including the link to Disability Resources Center is encourage. http://www.ou.edu/drc/home.html. [See Faculty Handbook (https://apps.hr.ou.edu/FacultyHandbook#5.4).]

Students requiring academic accommodation should contact the Disability Resource Center for assistance at (405) 325-3852 or TDD: (405) 325-4173. For more information please see the Disability Resource Center website http://www.ou.edu/drc/home.html Any student in this course who has a disability that may prevent him or her from fully demonstrating his or her abilities should contact me personally as soon as possible so we can discuss accommodations necessary to ensure full participation and facilitate your educational opportunities.

10.5 Title IX Resources and Reporting Requirement
For any concerns regarding gender-based discrimination, sexual harassment, sexual assault, dating/domestic violence, or stalking, the University offers a variety of resources. To learn more or to report an incident, please contact the Sexual Misconduct Office at 405/325-2215 (8 to 5, M-F) or smo@ou.edu. Incidents can also be reported confidentially to OU Advocates at 405/615-0013 (phones are answered 24 hours a day, 7 days a week). Also, please be advised that a professor/GA/TA is required to report instances of sexual harassment, sexual assault, or discrimination to the Sexual Misconduct Office. Inquiries regarding non-discrimination
policies may be directed to: Bobby J. Mason, University Equal Opportunity Officer and Title IX Coordinator at 405/325-3546 or bjm@ou.edu. For more information, visit http://www.ou.edu/eoo.html.

10.6 Adjustments for Pregnancy/Childbirth Related Issues

Should you need modifications or adjustments to your course requirements because of documented pregnancy-related or childbirth-related issues, please contact your professor or the Disability Resource Center at 405/325-3852 as soon as possible. Also, see http://www.ou.edu/eoo/faqs/pregnancy-faqs.html for answers to commonly asked questions.

10.7 Final Exam Preparation Period

Pre-finals week will be defined as the seven calendar days before the first day of finals. Please refer to OU’s Final Exam Preparation Period policy (https://apps.hr.ou.edu/FacultyHandbook#4.10).
