OU Event Emergency Plan Principles:

Preparedness for events on the OU campus involves the OU Executive Policy Group, OU Emergency Preparedness Manager, OU Fire Marshal, University Meteorologist, city and county emergency management, city and county police and fire departments and volunteer citizens. To meet these challenges and provide cohesion to organizing preparedness activities as well as event safety management, OU has created an Office of Emergency Preparedness (OEP). The OEP continually works to ensure that the OU campus is prepared for any events held on its’ property. OU takes an all-hazards approach to disaster preparedness for events, one that encompasses terrorist attacks, natural hazards such as weather, health emergencies, etc. The guiding principle to be shared with each event staff member is “If you see something, say something.”
Special areas of concern on our campus include, but are not limited to:
· Hazardous weather conditions
· Injuries/medical emergencies
· Suspicious behavior, activity, or packages
· Fire
· Missing/Lost Person

This Emergency Response Plan establishes OU’s response to any emergency that might occur during this event. In the event of an emergency, OUPD, first responders, and the OU Emergency Preparedness Manager will coordinate incident command.

Emergency Response Plan objectives include:

· **Life Safety** – Minimize suffering, loss of life, and personal injury resulting from hazardous or emergency conditions that could occur during this event.

· **Incident Stabilization** – Provide a framework for a comprehensive emergency management system that addresses preparedness, response, recovery and mitigation.

· **Protection of Property** – Minimize damage to property resulting from hazardous or emergency conditions that could occur during this event.

**EVENT DETAILS:**

**Weather:**
The University Meteorologist in coordination with the Emergency Preparedness Manager and/or personnel at the National Weather Center will monitor weather before and during this event. Concerns that may postpone, cancel or halt this event include the forecast/anticipation of:

a) Lightning within eight (8) miles of the event,
b) High winds sustained at 20 mph or gusts of 35 mph (these values are typical if temporary or inflatable structures are in use),
c) Hail of any size,
d) Extreme temperatures such as heat or cold. For winter season events, wind chill values below 32F will be monitored. If wind chills dip below 10F, outdoor activities could be suspended/cancelled. For summer season events, the Oklahoma Mesonet Wet Bulb Globe Temperature (WBGT) will be monitored. If WBGT exceeds 80F, heat and hydration advisories will be issued. If WBGT exceeds 90F, outdoor activities could be suspended/cancelled.
e) Precipitation
