GLOBAL ENERGY, ENVIRONMENT, AND RESOURCES COURSE LIST SPRING 2018:
NOTE: Please make sure to pay attention to the hour requirements for your major or minor since a certain number of hours must be upper-division and some courses must be IAS designated. If you have ANY questions, please make sure to consult with an IAS Advisor.

Course list is subject to change.

ATMOSPHERIC & GEOGRAPHIC SCIENCES (AGSC)
2014 Earth System

ENVIRONMENTAL STUDIES (ENST)
2623 Human Wildlife Interactions

GEOGRAPHY (GEOG)
3253 Environmental Conservation
3443 Environment & Society
4523 Life Cycle Analysis

HISTORY OF SCIENCE (HSCI)
1113 Science, Nature & Society
3473 History of Ecology & Environmentalism

INTERNATIONAL & AREA STUDIES (IAS)
2003 Understanding the Global Community
3013 International Law (Spring 2018 session)
3083 International Activism (2-week January course in Rio)
3603 Energy, Environment, & Climate Change in China
4013 IAS Capstone
Sec. 001 “Security: International Terrorism in Context”, MW 1:30-2:45pm, Dr. Rebecca Cruise
The media and politicians are quick to label all sorts of violent activity as terrorism, yet it is difficult to fully articulate exactly what terrorism entails. In this capstone we will explore how terrorism has been studied, and what conclusions have been made about who is engaging in terrorist activities and their motivations. In this we will explore the under-studied role of women in terrorist organizations historically and today. We will also attempt to remove the concept of terrorism from isolation, examining how terrorism interacts with politics, the media and organized crime. This will be done through the use of case studies of both domestic and international terrorism. We will also explore recruiting techniques, with special attention focused on ISIS and their keen use of the internet and Dark Web to find recruits around the world.

Sec. 002 “Global Resource Security”, TR 12-1:15pm, Dr. Bo Kong
The purpose of this Senior Capstone Seminar is to examine the role of natural resources in shaping the organization and consequences of international politics. Specifically, it will explore how concerns about
resource security galvanize the actions and interactions of a variety of actors, including individuals, firms, states, and international organizations, shape ideas and identities, and impact technologies and markets in a way that ultimately determine who gets what, when and how in the process.

Sec. 900 “Authoritarianism”, MW 4:30-5:45pm, Dr. Samer Shehata
The majority of the world’s population lives in non-democratic political systems. This course explores authoritarianism with particular focus on the varieties of authoritarian regimes, how such regimes endure, and why they (sometimes) collapse. What are the bases of support in authoritarian systems? How do these regimes produce compliance? And what are politics and everyday life like in such polities? In addition to examining variation among authoritarian regimes, this course will explore the role of elections, parliaments, and political parties in such systems as well as the international dimensions of authoritarianism. Although our focus will be comparative and cross regional, we will devote a number of sessions to authoritarian political systems in the Middle East, including the challenges to those systems posed by the 2011 Arab uprisings.

**METEOROLOGY (METR)**
1014 Intro to Weather & Climate

**PLANT BIOLOGY (PBIO)**
2404 Ecology & Environmental Quality
