Graduate Medical Education Handbook

2019-2020

The University of Oklahoma College of Medicine
School of Community Medicine
Notice

The Graduate Medical Education Handbook is a convenient first reference for general information regarding some items that relate specifically to graduate medical education (GME) and the residency programs. However, it is not intended as an exclusive reference manual for all University policies and procedures.

A complete posting of all updated and relevant general University policies may be accessed electronically at: https://apps.hr.ou.edu/staffhandbook

A complete posting of updated University of Oklahoma College of Medicine, School of Community Medicine policies that are specific to Graduate Medical are available electronically at: https://outulsa.medhub.com/index.mh

The information contained in this Handbook is current only at the time of publication and may change from time to time by the actions of the institution. Every effort will be made to ensure that the Graduate Medical Education Handbook is updated periodically. However, it is the responsibility of the user to determine that he or she is relying on the most current version of any particular policy. Questions concerning policies should be directed to the residency Program Director or the Graduate Medical Education Office.

Introduction

Welcome to the University of Oklahoma College of Medicine, School of Community Medicine. The School of Community Medicine, our residency and fellowship programs and affiliated teaching hospitals have a long, respected tradition of excellence in clinical training. We believe you will find your educational experience and training in our program stimulating and rewarding. Our goal is to provide excellent preparation for your medical career.

Graduate medical education (GME) includes all of the medical, surgical and other specialty and subspecialty residency programs and fellowships offered by the University of Oklahoma College of Medicine, School of Community Medicine and its affiliated teaching hospitals. Hereafter, all clinical training programs are referred to in this Handbook as residency programs. All clinical trainees, whether residents or fellows, are referred to in this Handbook as residents.

The School of Community Medicine, Tulsa Medical Education Foundation and affiliated institutions provide graduate medical education programs that meet the standards established by the Accreditation Council for Graduate Medical Education (ACGME) and its designated Residency Review Committees. Institutional oversight of residency programs and GME services is conducted through the Graduate Medical Education Committee (GMEC) and the Designated Institutional Official (DIO).

As a physician in residency or fellowship training, your primary responsibilities are participating in the educational aspects of your program and in the direct care of patients under the supervision of your program director and other faculty. The School of Community Medicine provides a general orientation for new residents in late June. Your program director will also provide an orientation for you to the following: the organization and structure of your residency program including educational goals and objectives; duties and responsibilities; rotation, call and vacation schedules; issuing of equipment (laptops, pagers, etc.); and a variety of other matters that will be integral components of your educational program.

Because of the complexity of graduate medical education and academic medical centers in general, administrative policies and procedures are necessary. The Graduate Medical Education Handbook has been compiled for your benefit and sets forth the guidelines that govern our residency training programs, with references to policies specific to our GME programs as well as certain regulations and policies of the University of Oklahoma. The Graduate Medical Education Committee and Program Directors, the affiliated teaching hospitals, the School of Community Medicine administration, and the Board of Regents of the University of Oklahoma are among those responsible for developing policies and procedures for GME. It is your responsibility to become thoroughly familiar with the material contained in this handbook, and other GME or University policies and/or procedures listed among the references.

As stipulated in your residency agreement (contract), you are obligated to abide by the regulations in the Graduate Medical Education Handbook and all pertinent GME and University policies. If you have questions concerning the information contained herein, please contact your program director GME Office.
All resident physicians and fellows new to The University of Oklahoma School of Community Medicine must contact their residency program coordinator and departmental payroll representative immediately upon arrival in Tulsa and before reporting to a hospital or performing any official duties.

Resident physicians and fellows cannot participate in patient care experiences until their professional liability insurance is in effect and a special license or a full medical license has been issued by the Oklahoma Board of Medical Licensure and Supervision or the Oklahoma State Board of Osteopathic Examiners.

The statements, terms and provisions contained in the *Graduate Medical Education Handbook* are subject to change at any time by the Board of Regents and/or the administration of The University of Oklahoma, which expressly reserves the right to make any changes or to establish new policies, rules and regulations from time to time as it deems necessary and proper. The establishment of new GME or University policies, rules and regulations will be expressly for the purpose of improving the quality of the residents’ or fellows educational experience.
Office of Graduate Medical Education and Graduate Medical Education Committee (GMEC)

1. The Office of Graduate Medical Education provides administrative support services for residents and fellows, and acts in a liaison capacity between the administration of OU College of Medicine, School of Community Medicine, affiliated teaching institutions, the residents and students.

2. The GME Coordinator is available to answer questions; complete forms; process applications; assist in obtaining special and full medical licensure; ECFMG, DEA and OBNDD certifications; assist with USMLE and COMLEX applications; coordinate the National Residency Matching Program (NRMP); and perform a variety of other tasks. The telephone number for this office is (918) 660-3505.

3. The Designated Institutional Official (DIO) provides guidance to the resident, spouse, significant other and his or her family members, as well as consultation related to student teaching and evaluation strategies.

4. The small number of students and residents at the School of Community Medicine permits close, personal attention not only in the teaching programs but also in the services provided to its resident physicians.

The Graduate Medical Education Committee (GMEC) is the designated committee responsible for institutional oversight of residency training programs under guidelines established by the ACGME. Membership of the GMEC includes program directors, residents selected annually by their peers and the Chief Medical Officers of Tulsa Medical Education Foundation hospitals. Also participating in GMEC meetings are administrative representatives of the School and residency program coordinators. The GMEC works with the School of Community Medicine administration and all program directors to carry out its functions of institutional oversight and policy making.
Section 1: Resident Eligibility and Appointment

Eligibility, Selection and Record of Training

Specific policies regarding eligibility, selection and record of training are available in MedHub at: https://outulsa.medhub.com/index.mh

Personal Health Requirements

Evidence of adequate immunization including measles, mumps, rubella, polio, and hepatitis B is required on initial entry into a residency training program or must be promptly obtained. Influenza immunization is recommended annually for individuals involved in providing care to high-risk patient groups. TB skin tests are required upon entry into a program and annually thereafter. If a resident reports a physician-documented positive TB skin test, he/she is exempt from further annual TB skin tests, but must follow the University’s tuberculosis policy regarding Mantoux conversion. The University’s tuberculosis policy was adopted pursuant to federal and state guidelines. Copies of the policy are available from the Office of Environmental Health and Safety.

Residents must also comply with all infection control and infectious exposure policies applicable to the medical staff in the affiliated hospitals and facilities to which they are assigned for rotations.

Familiarity with Occupational Safety and Health Administration (OSHA) requirements is essential and periodic instruction is mandatory. Compliance with "universal precautions" as defined by the Centers for Disease Control and institutional infection control practices is expected.

*Failure to comply with the above noted requirements may result in suspension or termination from the residency program.*

Residency Agreement

Each individual offered a residency appointment will be provided with a contract known as the Residency Agreement. Each resident is expected to read, sign and abide by the Residency Agreement. The regulations published in the Resident Handbook, as well as the GME and University policies and procedures referenced in the handbook, are referred to in the Residency Agreement and are applicable as stipulated in the Residency Agreement.

Residents are appointed for a period of one year or as specified in the individual Residency Agreement. **Renewal of any residency appointment is contingent upon the resident meeting the performance and attendance standards of the program**
**and University, and is not automatic.** Intention by either party not to renew the appointment should be accompanied by appropriate notification as stipulated in the Residency Agreement. Under ordinary circumstances, four (4) months written notice of intent not to renew the agreement will be given.

Notwithstanding the notice provision, the University may terminate the appointment of a resident or give notice of intent not to renew the appointment for academic or disciplinary reasons, or failure to appropriately progress within the four months prior to the end of the contract period, with as much written notice as circumstances will reasonably allow. *See Administrative Academic Actions.*

Please note: Residents are not allowed to begin work if they have not completed the Employment Eligibility Verification Form (I-9) within three (3) days of employment. Federal law requires this form, and failure to complete this form may result in termination. Failure to complete any other documents required by Federal or State law to confirm lawful presence in the United States may also result in termination.

**Section 2: Resident Benefits and Resources**

**Resident Benefits**

**Salary (Stipend)**
A salary will be paid to each resident on a monthly basis. Salary levels are based upon the resident’s *functional level of postgraduate training* in the specific program in which he or she is currently training. PGY levels attained in previous training programs (if applicable) are not relevant to determining current salary level. Salaries are adjusted periodically upon review and recommendation of the GMEC and upon approval by the major affiliated institutions approved by the ACGME for residency training that provide funding for resident salaries. Salaries are distributed by the central payroll office of the University of Oklahoma Health Sciences Center (OUHSC) and are distributed via electronic direct deposit. Additional information about salary distribution will be provided to the resident by the Program Director’s office.

**Benefits**
In addition to the monthly stipend, the University provides employee benefits including medical, basic dental, vision, life insurance and long-term disability. Full details on employee benefits can be found at [http://www.hr.ou.edu/](http://www.hr.ou.edu/)

Medical coverage is available in a couple of options including PPO and HSA. The specific tier and medical coverage option selected by the resident will determine the additional cost (if any) which must be paid by the resident. Other resident-paid options include spouse and/or family medical coverage, long-term-care insurance, and options for an increase in the basic dental or life insurance coverage. Residents and fellows are also eligible to participate in the University’s retirement plan at their own expense.
In addition to the website above, the School of Community Medicine’s benefits coordinator may be reached by phone at 918 660-3192 or in person in the Office of Human Resources, 2C hallway at the Schusterman Center.

Professional Liability Insurance
The University provides professional liability insurance for residents and fellows through Academic Physicians Insurance Company, a captive insurance company covering only University physicians for professional liability and residents for their assigned educational experiences in connection with providing medical care through a residency or fellowship program.

The following guidelines pertain to residents in regard to their professional liability insurance coverage:

- Ongoing coverage is contingent upon the resident’s or fellow’s timely completion of the University’s mandatory annual risk management training.
- All residents are automatically enrolled in professional liability coverage through APIC, which provides an occurrence policy for supervised medical practice within the scope of the training program. Residents will receive necessary instructions from their Program Director regarding professional liability insurance.
- Residents who are involved in an adverse outcome or any situation where a claim by a patient can be anticipated, or who have been notified of legal action, must immediately notify their Program Director and the OU Physicians Office of Risk Management. NOTE: This is not the same Department as Hospital Risk Management, which is not a School of Community Medicine or OU Physician’s office. Residents should contact OUP’s Risk Management office first, and they will coordinate with the hospital’s risk managers.
- Professional activities outside the scope of the residency training program are not covered by the residency program policy. This includes most so-called “moonlighting” activities. Residents engaging in any unsupervised professional activities must seek written approval from their Program Director, and must apply for and purchase, at their own expense, additional professional liability insurance covering these activities. The policy on resident moonlighting is listed on the GME Website at: https://outulsa.medhub.com/index.mh
- Questions regarding coverage, and reports of adverse events, can be addressed by the OU Physicians Patient Safety, and Risk Management at 918.660.3628. A Risk Manager is available 24/7 and calls after hours are transferred to the on-call risk manager for the School of Community Medicine OU Physicians.

Annual Leave
Each resident earns a maximum of 15 University business days (M-F) of paid annual leave per year. Training regulations imposed by the national certifying boards in some specialties may limit the amount of leave which may be taken by a resident to a lesser amount. Earned but unused annual leave time may not be carried over from one academic year to another. No additional payment will be made for unused annual leave upon completion of residency training or at any other time. The leave request should be
submitted to the Program Director at least 120 days prior to the requested date. Requests submitted less than 90 days for the requested date will be reviewed on a case-by-case basis by the program director and/or their designee for approval. The program director and/or their designee reserves the right to deny approval of requests submitted less than 90 days. There is a legitimate need for Program Directors to limit the number of residents who are absent at any one time and to otherwise assure continuity of quality health care for the patients on their service. Annual leave requests shall be honored according to the policy established by each residency program.

NOTE: Annual leave, like all other benefits to residents, does not carry over from year to year. It does not accrue over time. The Resident Agreement is for one year only, thus, at the end of each year, the terms of the agreement are void, which means all benefits end on the final day of the Agreement.

Sick Leave
Each resident earns a maximum of 15 days (M-F) of paid sick leave per year. Unused sick leave will not be carried forward to the next academic year. No additional payment will be made for unused sick leave upon completion of residency training or at any other time. Beyond the 15 days of paid sick leave, leave without pay is possible contingent upon recommendation by the Program Director and approval by the GME Office. The University complies with the Family Medical Leave Act. Requests for sick leave may require documentation from a healthcare provider, at the discretion of the Program Director.

Leave of Absence
If the leave of absence is for personal reasons, as determined by prior approval from the GME Office, and not for medical reasons and the resident has accrued annual leave, the leave of absence will be paid to the extent of the accrued annual leave. Once the annual leave is exhausted, the remainder of the leave of absence will be unpaid. If the leave of absence is for medical reasons, the leave of absence will be paid to the extent of the unused annual leave and sick leave. Once the annual leave and sick leave are exhausted, the remainder of the leave of absence will be unpaid. Any leave of absence without pay must be approved by the Program Director and the DIO. During leave without pay, some benefits, such as health insurance, may not be paid by the University. In addition, leave without pay may extend the residency training period. A resident may not take a leave of absence longer than 30 days per academic year as long as the leave is not a qualifying FMLA event. Please refer to the Family Leave Policy regarding FMLA.

Administrative Leave
Administrative leave may be awarded for an emergency as defined by the GME Office, and may be with or without pay, depending upon the circumstances, as determined by the GME Office.
**Holiday Leave**
Residents do not receive credit or additional pay for holiday time during hospital rotations. Since hospitals do not observe a holiday schedule for patient care, residents are expected to follow their assigned schedule. If annual leave time is scheduled during a holiday period, then the holiday must be scheduled as annual leave. If the resident is assigned to a clinic that observes a holiday schedule, then the resident need not count that time toward his/her annual leave time. Residents should check with their Program Director’s office for further clarification of holiday leave time.

**Educational Leave**
Educational leave is limited to the time of attendance and/or participation in a professional meeting related to the trainee’s area of specialty and can be no more than one week in duration and must be within the USA. Utilizing education leave for conferences within Canada and Mexico will be considered, with DIO approval, and limited to annual meetings of medical organizations representing North America and whose annual meetings actually rotate among North American countries. Residents may request up to five days of educational leave each year. The request should be submitted to the Program Director at least 120 days prior to the requested leave date. Requests made less than 90 days before the scheduled date for a conference/meeting will be reviewed on a case-by-case basis by the program director and/or their designee for approval. The program director and/or their designee reserves the right to deny approval of these requests submitted less than 90 days. Approval is granted solely at the discretion of the Program Director, who also determines the travel reimbursement policy for the individual residency program.

International travel for educational leave is subject to the requirements in GMEC policy SCM 724.0 regarding resident off-campus experiences. Of special note in GMEC policy 724.0 are instructions for visa holders seeking off-campus or international educational experiences, instructions for all residents regarding University approval of sites for educational experiences outside the United States, and rules for booking travel and applying for travel reimbursement.

**Discretionary Leave**
Discretionary leave is limited up to 10 days per academic year and is at the discretion of the Program Director limited to these special circumstances: board and licensure exams, fellowship interview days, employment interview days, and bereavement. Recognizing that obtaining the proper postgraduate employment or further training is an essential end result of residency training, paid time off above and beyond annual leave is allowed for fellowship and employment interviews. Please refer to the Procedure for Utilizing Discretionary Leave for proper documentation.

NOTE: Annual leave MUST be used if a fellowship interview occurs during a VA rotation.

Because of the tax implications of direct reimbursement to residents from outside entities being viewed by the IRS as earned income, travel compensation awards must be processed by following current OU travel procedures and carried out by their
department. Reimbursement will be based only on those items documented with receipts and in accordance with current departmental and University travel policy. **Residents must consult their Program Director’s office well in advance of attending any such event in order to obtain guidance on these matters.**

**Family Leave**

Federal law mandates that, **after one year of University employment**, qualified employees may take up to 12 weeks of leave (available paid leave and then unpaid leave) during any 12-month period for (1) the birth of a child; (2) the placement of a child for adoption or foster care; (3) the care of a spouse, parent, or child with a serious health condition; and (4) a serious health condition that makes the employee unable to perform the employee’s job functions. Contact Human Resources for additional information or visit hr.ou.edu for further information.

The University will continue to pay the cost of the University provided insurance coverage for employees for the 12 weeks of FMLA protected leave. The employee will continue to be responsible for payment of premiums for any elective coverage. It is the employee’s responsibility to contact Human Resources to determine premium payment requirements.

The following guidelines pertain to resident requests for family leave:

- **Maternity/Paternity Leave**  
  Available sick leave, annual leave time or leave without pay may be used in accordance with the Family Leave Act guidelines as described above. Specific questions should be addressed to the Program Director.

- **Requests for Family Leave**  
  Residency program schedule changes require considerable planning to assure that patient care and residency colleagues' education are not impacted negatively. Therefore, requests for family leave should be made in writing to the Program Director as soon as the need is known.

**Effect of FMLA or Extended Leave of Absence on Specialty Board Requirements**  
Depending on specialty board requirements, periods of leave may extend the length of the residency training needed to meet RRC and/or specialty board requirements. If an ACGME RRC and/or the Specialty Board restricts time off to less than six (6) weeks in an academic year, the Program Director will defer to the allowable RRC and/or Specialty Board Eligibility requirement(s), thus, the resident may be required to make up any time missed in accordance with these requirements.

**Resources for Counseling and Psychological Support Services**

Counseling and support services are available for a variety of resident issues including but not limited to the following: study and test-taking skills, reducing test/evaluation
Guidelines for Mental health Services for Residents is available online at: http://hr.ou.edu/Healthy-Sooners/Employee-Assistance-Program and http://www.ou.edu/content/tulsastudentaffairs/resources/counseling.html

Other Resources and Contacts
1. OU Behavior Intervention Team (BIT) http://www.ou.edu/content/tulsa/bit.html
2. OU Institutional Equity Office http://www.ou.edu/eoo.html
4. ACGME well-being resources http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being
5. The National Suicide Prevention Lifeline 1-800-273-8255 https://suicidepreventionlifeline.org/

In addition, the University of Oklahoma Staff Handbook includes a policy on Prevention of Alcohol Abuse and Drug Use on Campus and in the Workplace. The complete policy is also available upon request from the Human Resources Office. The HR office can be reached by phone at (918) 660-3190. The OU Staff Handbook policy can be accessed online at: https://apps.hr.ou.edu/staffhandbook

Section 3: Licensure

Oklahoma Medical Licensure

It is the responsibility of each resident to complete all licensure applications and documents in a complete manner in compliance with established deadlines. While this section reflects policies in place at the time of publication of this edition of the Resident Handbook, policies governing medical licensure and differing from those listed below may be enacted at any time by the respective medical licensing boards or by statute. Residents must be aware of and follow policies in effect at the time of any licensure question or issue. Residents will not be allowed to start their training program unless they are licensed. Failure to comply with (1) the medical licensure laws of the State of Oklahoma and (2) the institutional requirements regarding
licensure shall be sufficient grounds for suspension and or termination of residency training. Up to date information regarding licensure is always available by contacting the respective board or visiting their websites as noted below.

<table>
<thead>
<tr>
<th>Allopathic Physicians (M.D. Degree)</th>
<th>Osteopathic Physicians (D.O. Degree)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. The Oklahoma State Board of Medical Licensure and Supervision (Board) licenses allopathic physicians to practice medicine in the State of Oklahoma. Residents in training programs must hold either a special license or an unrestricted license issued by the Board as is stipulated in the section on eligibility requirements. The Board requires successful completion of the United States Medical Licensing Examination (USMLE). Any applicant for licensure who fails any step of the USMLE three (3) times or takes longer than a ten (10) year period to obtain all steps of USMLE may not be eligible for licensure. Appropriate licensure is a requirement for employment.</td>
<td>A. Osteopathic physicians must meet the licensure requirements of the Oklahoma State Board of Osteopathic Examiners, including passing Steps 1-3 of COMLEX or USMLE, and must be licensed by July 1st of their PGY-2 year. No special license is required during the first year of graduate medical education training for osteopathic physicians.</td>
</tr>
<tr>
<td>B. Institutional Policy for Allopathic Residents</td>
<td>B. Institutional Policy for Osteopathic Residents</td>
</tr>
<tr>
<td>It is the policy of the University of Oklahoma School of Community Medicine that all allopathic applicants for residency positions must have passed both Step 1 and Step 2 CK and CS of the USMLE. All appointments at the PGY-2 level and above must have passed Steps 1-3 of the USMLE. Failure of a current resident to obtain full licensure by the expected time of promotion to the PGY-3 year may result in immediate suspension or termination from the residency appointment.</td>
<td>It is the policy of the University of Oklahoma School of Community Medicine that all osteopathic applicants for residency positions must have passed Step 1 and Step 2 CE and PE of the COMLEX USA prior to being included on a rank order list or otherwise offered a position. All osteopathic residents must pass the final step of the osteopathic examination by the end of the first year (PGY-1) of residency training. Any osteopathic applicant considered initially for any clinical training position at the PGY-2 or above levels, must have passed COMLEX USA Steps 1-3 and be fully licensed in the State of Oklahoma.</td>
</tr>
</tbody>
</table>
### Allopathic Physicians (M.D. Degree)

**C. Allopathic Licensure Board Address**
At the time of publication of this Handbook, the mailing and website address for the Board of Medical Licensure and Supervision is:

- Oklahoma State Board of Medical Licensure and Supervision
  - P.O. Box 18256
  - Oklahoma City, OK 73154-0256
  - or
  - 101 NE 51st Street
  - Oklahoma City, OK 73105
  - Telephone: (405) 962-1400
  - www.okmedicalboard.org

### Osteopathic Physicians (D.O. Degree)

**C. Osteopathic Licensure Board Address**
At the time of publication of this handbook the mailing and website address for the Board of Osteopathic Examiners is:

- Oklahoma State Board of Osteopathic Examiners
  - 4848 N. Lincoln Boulevard, Suite 100
  - Oklahoma City, OK 73105-3335
  - Telephone: (405) 528-8625
  - http://www.ok.gov/osboe/

### D. Applying for an Allopathic Medical License:

*Completion of the application process for either an unrestricted license or special license is the sole responsibility of the resident.* Applications are detailed and include requirements for several documents and forms that must be mailed to the applicant's medical school, to examination boards for verification of scores, to any other institution in which the resident has completed any residency training, and to the licensing board of any other state in which the resident is currently or has been previously licensed to practice medicine. This procedure takes weeks, and occasionally months; therefore, residents are advised to obtain the necessary forms and begin the process as early as possible.

### D. Applying for an Osteopathic Medical License:

*Completion of the application process for either an unrestricted license or special license is the sole responsibility of the resident.* Many of the osteopathic board’s licensure requirements for documents and verifications are similar to those outlined for allopathic physicians. Accordingly, the applicant should begin the process as early as possible in order to meet all deadlines.

---

**Prescribing Privileges and Narcotics Registration**

The GME policy regarding prescribing privileges for residents, including narcotics prescribing and registration is available in MedHub [https://outulsa.medhub.com/index.mh](https://outulsa.medhub.com/index.mh)
Please make special note of the following:

- Osteopathic PG1 residents are not licensed. Their prescriptions must include the printed name of the supervising physician.
- Prescriptions may be written only for patients established within the practice. Prescriptions must not be written for colleagues, friends, family or others not established as patients of the practice. Violations may prompt termination.

**Section 4: Workplace**

**PATHOGEN EXPOSURE PROTOCOL**

The vast majority of Workers Comp related injuries sustained by our residents are needlestick injuries, scalpel sticks, or splash exposures. Injuries must be reported to OU within 30 days or the claim can be denied (state law). If you sustain such an injury while on duty at St John Medical Center, please report it as directed onsite. You will be seen at:

St John Associate Occupational Health and Wellness  
1802 East 19th St.  
Tulsa, OK 74104  
phone: 918-744-2979  fax 918-744-3018

You should report to Associate Occupational Health within 1-2 hours after the injury. If the injury occurs after hours, on weekends, or holidays contact the facility’s Nurse Supervisor through the operator. If your injury is sustained at an OU Clinic, immediately notify the clinic manager. If your injury is sustained at any outside hospital/clinic, immediately contact Employee Health Services at that facility.

St. John will draw your initial labs & report your injury to us as well as to our Employee Health. Associate Occupational Health or the Clinic Manager will facilitate acquiring the SOURCE’S blood labs: Rapid HIV(if available), HIV-1/HIV-2 antibody screen with reflex, Hepatitis B surface antigen, Hepatitis C virus antibody.

Any follow-up labs you may need will be drawn by Access Medical (see addresses below).

Your Resident Program Coordinators will be notified of all exposures and injuries and compliance with follow-up and policies.

**ON-THE-JOB INJURIES**

These include sprains, strains, falls, fractures, etc.
1. **How soon should I report an on-the-job accident/injury?** An accident/injury, even if you don’t need immediate medical care, must be reported directly to the employer (HR) within 30 days by or there is a rebuttable presumption that the accident/injury is not work related & the claim will be denied. (Oklahoma law)

2. **Where do I go for medical care if I have an on-the-job injury?** Workers Compensation law requires employees to be treated by a “certified workplace medical provider”. These facilities are the only ones authorized to provide medical treatment for OU-Tulsa employees. You may NOT be treated by any OU clinic or provider, or your personal physician.

For **MINOR** emergencies or injury evaluation:

**ACCESS MEDICAL: Main Locations**

<table>
<thead>
<tr>
<th>Access Medical</th>
<th>Access Medical</th>
<th>Access Medical</th>
</tr>
</thead>
<tbody>
<tr>
<td>2929 S. Garnett Road</td>
<td>10221 E. 81st St.</td>
<td>1623 S. Utica</td>
</tr>
<tr>
<td>Tulsa, OK 74129</td>
<td>Tulsa, OK 74133</td>
<td>Tulsa, OK 74104</td>
</tr>
<tr>
<td>(918) 665-1520</td>
<td>(918) 252-9300</td>
<td>(918) 392-5100</td>
</tr>
</tbody>
</table>

*Access Medical is always your “starting point” for Workers Compensation treatment. Should you need a referral to a specialist, Access Medical will coordinate with CCMSI to get you seen as soon as possible by a specialist here in town.*

Also: see additional locations on attached sheet. YOU MUST SHOW YOUR OU-TULSA STAFF I.D. AT CHECK-IN. Hours: Monday – Saturday 8:00 am – 8:00 pm / Sunday 11:00 am – 7:00pm. No appointment is necessary.

Although you will receive copies of medical bills, Access Medical knows to bill your Workers Comp treatment to CCMSI. Please escan any bills you receive to kim-little@ouhsc.edu.

If a **MAJOR** injury occurs or for emergencies after 10:00 pm, employee should proceed to the Emergency Room via ambulance or vehicle to either:

<table>
<thead>
<tr>
<th>St John Medical Center</th>
<th>Saint Francis Hospital</th>
</tr>
</thead>
<tbody>
<tr>
<td>1923 S. Utica, Tulsa, OK</td>
<td>6161 S Yale, Tulsa, OK</td>
</tr>
</tbody>
</table>

3. **Who determines if my injury is covered under Workers Compensation?**

"Work related injury/illness" is defined as occurring *directly* through the course & scope of your employment. Our Claims Administrators at CCMSI will evaluate the circumstances of your injury, your medical treatment records, consult
with OU staff, & will determine if your injury meets the legal definition of a workplace injury.

**Are there forms I need to fill out?** A “Report of Injury” form must be completed by the employee & supervisor as soon as possible when the employee has an on-the-job accident, even if no medical care appears to be necessary. Your supervisor has these forms. Also, you can find these forms by visiting the Workers Comp website, or by emailing or calling Kim Little, 660-3196. Kim-Little@ouhsc.edu. These forms must be completed as soon as possible following your injury or evaluation in order to get the injury on file with our Workers Compensation claim administrator. Remember: Failure to timely report (30 days) will result in denial of your claim.

**Not sure what to do? Have questions?** Please email Kim Little at kim-little@ouhsc.edu or call 660-3196.

**Resident Work Hours**

A complete explanation of work hours expectations is found in the policy located in MedHub at: https://outulsa.medhub.com/index.mh

Please note the following:

- Residents are professionally responsible for submitting timely and accurate records of their work hours
- Programs implement specific policies and procedures consistent with the institutional and program requirements for resident work hours

**Resident Moonlighting**

While a complete explanation of moonlighting requirements is found in MedHub at: https://outulsa.medhub.com/index.mh please note the following:

- Moonlighting is defined as any professional medical activity outside the usual training experience and includes both compensated and uncompensated (e.g., voluntary) activities
- Prior to any moonlighting activity, the resident must obtain written approval from the program director
- All moonlighting work hours must be submitted in to the work hours tracking system
- All moonlighting work hours must be counted toward the same ACGME work hour limitations pertaining to all clinical and academic activities related to the program.

**Off-campus Electives**

An off-campus elective may be considered for approval when an educational experience cannot be obtained at one of our major affiliated institutions. A complete explanation of the criteria for approval may be found in the policy in MedHub at: https://outulsa.medhub.com/index.mh
Resident Executive Council

The meetings of the Resident Executive Council provide an open avenue of communication and are attended by the DIO, the Associate DIO, and Office of Resident and Student Affairs.

A representative and an alternate member should be elected by their peers in each program to serve on the Resident Executive Council. These two members serve as the spokesperson(s) for their department and are responsible for communicating Council activities to their fellow residents.

Purposes of the Resident Executive Council:

- To provide an effective forum for communication between residents, administrations, and faculty.
- To build interdepartmental relationships and collaboration among our residents.
- To discuss any subjects of interest to the resident in any program. All topics are fair game for these meetings – no matter how big or small.
- The selection of two resident members for each Internal Review Team.

The Chair of the Council attends and becomes a full voting member of GMEC.

Medical Library

1. Located on the Schusterman Center campus at 4502 E. 41st Street, the Medical Library Building is on the east side of campus, 1 block south of the intersection of 41st Street and Yale Avenue, just north of the Learning Center.

   Telephone: (918) 660-3220    FAX: (918) 660-3215

2. The purpose of the Library is to meet the informational needs of its users for patient care, education and research.

   Library hours:
   Monday – Thursday    7:30AM – 11:00PM
   Friday                7:30AM – 7:00PM
   Saturday              1:00PM – 6:00PM
   Sunday                1:00PM – 11:00PM

3. The OU-Tulsa library subscribes to over 400 journals in print and provides online access to nearly 18,000 full-text electronic journals. Almost all of the 15,000 books in the library may be checked out. The usual checkout period for students, faculty and staff is 3 months. Textbooks used by medical students for their rotations may be checked out for the length of rotation. Electronic versions of several hundred medical books are available thought the library’s online databases.
4. Library services include literature searching, document delivery. Books and articles in journals not owned by the Library can be obtained through interlibrary loan.

5. Material may be checked out and returned at the library’s front desk. Requests for items the library does not own may be placed through the ILLIAD electronic interlibrary loan system. ILLIAD registration information is found on the library’s home page. Most articles are now delivered electronically, often within three to five days; material which comes in the mail will usually be available within two to three weeks.

6. Technology - The Library has twenty student computer work stations with Internet access and many software applications. Computer training classes are available throughout the semester. Participants can register at http://www.ou.edu/content/tulsa/IT.html Printing, copying and scanning are also available. The library has full wireless connectivity, remote access to library resources and all students/residents have a home drive available for their use. The library has these electronic devices available to check out: eeePC laptops, flip video camcorders, DVD players (in-library use only).

7. The library provides access to many excellent online e-resources including Access Medicine, ACP Medicine, BoardVitals, DynaMed Plus, Exam Master, JAMAevidence, Journal Citation Reports, Micromedex, Ovid databases, Primal Pictures Interactive Anatomy, PubMed, Scopus, Visible Body, BisualDx, Web of Science, WorldCat, and more. Most, not all, have full text articles ready to be printed. All can be accessed off-campus, excluding UpToDate. Presently, UpToDate is made available to residents on campus not using a wireless connection. Online tutorials, database workshops, Ask-a-Librarian service and one-on-one individual instruction sessions are available to help you with these resources. Call the library anytime for assistance at 918-660-3220.

8. Health Professional Mobile Apps – Follow this link to view various mobile applications for health professionals including DynaMed, Epocrates Rx, MedCalc, MedlinePlus Mobile, Micromediex and more. https://library.tulsa.ou.edu/main/healthprofessionals

The Resident Work Environment

The University of Oklahoma has policies relating to disability accommodation, discrimination, consensual relationships, harassment and sexual assault. These policies and grievance procedures for complaints are available online at: https://apps.hr.ou.edu/staffhandbook

Additional GME policies are available in MedHub at: https://outulsa.medhub.com/index.mh
Section 5: Resident Responsibilities and Supervision

Resident Physician Responsibilities

Specific duties and responsibilities are assigned by individual Program Directors. Physicians engaged in the residency training programs of the College of Medicine-Tulsa are, however, generally expected to:

1. Develop a personal program of self-study and professional growth with guidance from the Program Director and faculty.
2. Participate in safe, effective and compassionate patient care under appropriate supervision that is commensurate with their level of advancement, skill, and responsibility.
3. Participate fully in the educational activities of their program and, as required, assume responsibility for teaching and supervising other residents and students as is appropriate.
4. Fully meet the performance requirements of the residency program.
5. Participate in institutional programs and activities involving the medical staff and adhere to established practices, procedures, and policies of the affiliated institutions and hospitals.
6. Act by accepted principles of medical ethics and the ethical obligations of employees of a state agency and follow GME Policy on Relationships with Medical Vendors. This policy can be accessed online in MedHub at: https://outulsa.medhub.com/index.mh
7. Participate in institutional committees and councils, especially those that relate to patient care review activities.
8. Participate in faculty and program evaluation, as well as department and institutional quality improvement activities.
9. Refrain from engaging in any outside employment or professional activities without written approval from the Program Director. The GME policy on moonlighting can be accessed online at: https://outulsa.medhub.com/index.mh

Resident Supervision

In the clinical learning environment, each patient must have an identifiable, appropriately-credentialed and privileged attending physician who is ultimately responsible for that patient’s care. This information should be available to residents, faculty members, and patients. Residents and faculty members should inform patients of their respective roles in each patient’s care. For a complete description of the expectations for resident supervision, see the policy at https://outulsa.medhub.com/index.mh

Medical Records

Properly maintained and completed medical records are of the utmost importance in
caring for patients and also serve as a basis for some clinical investigative work. Therefore, great emphasis is placed on the preparation, maintenance and preservation of medical records in the hospitals and clinics. Although computerized clinical information systems continue to expand in all of our patient care facilities, there is still use of and dependence on written medical records. Accordingly, residents should be aware of the rules and regulations regarding medical records at each affiliated institution through which they rotate in the course of their training, and are responsible of timely and accurate adherence to such policies.

Specific rules concerning medical records vary with the different services and hospitals, and each resident is responsible for the instruction of junior residents on these rules.

Policies specific to resident and fellows regarding Electronic Medical Records (EMRs) at all OU Physicians facilities include:

**Signatures:**

- Clinical list updates should be completed and signed at the end of each visit.
- Office visits should be completed and signed on the date of service.
- All other documents should be reviewed and signed as soon as possible but consistently within 10 business days.
- Documents are delinquent beginning on the eleventh (11) business day after the clinic visit or receipt of the document.
- If a provider anticipates being unavailable to sign ancillary reports (for example labs, radiology, etc), documents may be signed by a covering provider so that timely signatures will occur.

**Delinquent Documents:**

- The clinic manager, medical records supervisor, program director or program coordinator will communicate delinquent documents to residents/trainees via the University e-mail system. Suspension of clinical privileges may occur if the resident/trainee does not complete the medical record(s) within the specified time period,
- The department chair and/or residency program director may elect to take further action in accordance with departmental or program policy.

**Medical Examiner Cases**

There is often confusion as to which deaths come under the purview of the medical examiner. State law (63 Okla.Stat. §938) is quite specific and requires that the medical examiner be notified of deaths in the following categories:

1. Violent deaths, whether apparently homicidal, suicidal, or accidental, including but not limited to, deaths due to thermal, chemical, electrical, or radiational injury, and deaths due to criminal abortion, whether apparently self-induced or not;
2. Deaths under suspicious, unusual or unnatural means;
3. Deaths related to disease which might constitute a threat to public health;
4. Deaths unattended by a licensed medical or osteopathic physician for a fatal or potentially-fatal illness;
5. Deaths of persons after unexplained coma;
6. Deaths that are medically unexpected and that occur in the course of a therapeutic procedure;
7. Deaths of any inmates occurring in any place of penal incarceration; and
8. Deaths of persons whose bodies are to be cremated, buried at sea, transported out of state, or otherwise made ultimately unavailable for pathological study.

**Unattended by licensed physician**
The individual must have been under care for a fatal or potentially fatal illness. Deaths in this category are usually:
1. Persons found dead without obvious cause;
2. Unattended at any time by a licensed physician;
3. Unattended by a physician during terminal illness that appears unrelated to previous diagnoses;
4. Sudden death, when in apparent good health;
5. After rapidly fatal, unexplained illness;
6. Fetal death attended by a midwife.

Cases constituting a possible hazard to the public health often fall into these categories.

It is emphasized that a nonviolent death within 24 hours after hospital admission is not necessarily a medical examiner case. Patients dying shortly after entering emergency rooms are not necessarily medical examiner cases. If the probable cause of death can be ascertained from the history and physical examination, and if the cause of death can be said to be natural, a medical examiner’s investigation is unnecessary.

All deaths following injury must be reported to the medical examiner regardless of the interval between injury and death, if the injury is in any way related to the death.

**Professional Appearance**

The University of Oklahoma College of Medicine, School of Community Medicine has no formal dress code for residents. However, given the special nature of dealing with patients and their families, there are certain guidelines that are appropriate.

Professional appearance, attire and demeanor are a demonstration of respect for the patient and the profession, and of self-respect. This professional appearance and demeanor should be maintained at all times by all health professionals. Individual programs will inform residents of standards or requirements unique to that department or program. The resident must abide by the prevailing standards of the facility in which they are working.

University of Oklahoma College of Medicine, School of Community Medicine personalized lab coats and name tags are issued to each resident and must be worn for
purposes of identification by patients, families, hospital staff and clinic personnel.

**Equipment**

Residents may be assigned pagers, keys, electronic pass cards, parking cards, computers, electronic tablets and other equipment or items as deemed necessary. Residents are responsible for the equipment originally assigned to them by the program and must not exchange their equipment with other residents unless authorized to do so by the Program Director. If equipment malfunctions, it must be returned to the department for exchange or repair.

Pagers will be issued, returned for repairs, exchanged, logged and checked in, in accordance with the policies of the individual residency programs. In the event of loss or destruction, the resident to whom the equipment was assigned is responsible for the replacement cost of the item.

Before a resident completes or leaves a University of Oklahoma College of Medicine, School of Community Medicine training program, any equipment keys, and other items assigned to the resident must be returned in good working order by the last working day.

**Interactions With Vendors**

The University of Oklahoma College of Medicine maintains a policy on interactions with vendors. The purpose of this policy is to assist faculty, residents, students and staff in maintaining ethical working relationships with vendors in accordance with state ethics laws, federal regulations, guidelines of professional and industry organizations and the ethical standards of medical professionals.

The College of Medicine policy is very important in regard to how our faculty, residents and staff interact with vendors in the patient care environment, and in regard to educational support, gifts, meals and other interactions.

All residents are encouraged to familiarize themselves with the full policy, which is accessible online at: [https://outulsa.medhub.com/index.mh](https://outulsa.medhub.com/index.mh)

**Section 6: Promotion and Academic Actions**

**Resident Evaluation and Promotion**

Residents are regularly evaluated by attending physicians and program directors regarding attainment of required competencies and other evaluation methods that
include peers, nursing staff and patients in the process.

Reappointment and promotion to a higher level of postgraduate training is based upon completing all required curricular and program requirements for the current level of training, meeting the performance standards of the program and demonstrated the expected level of competency.

All residents are encouraged to familiarize themselves with the GME policy on Resident Evaluation and Promotion, which is accessible online at: https://outulsa.medhub.com/index.mh

Administrative Academic Actions

Administrative academic actions include, but are not limited to, oral reminders, written notification and resident improvement plans, suspension, non-promotion, non-renewal of residency agreement, and termination from the residency program. The particular administrative action imposed shall be based on individual circumstances and will not necessarily follow the sequential order in which they are described below. In the event a resident is subject to any administrative action beyond an oral reminder, the Program Director shall provide the resident written notification of the action, with a copy to the resident’s file and the DIO.

Note: When actions beyond oral reminders occur, the University may be required to disclose or report the matter to affiliated institutions, medical licensing agencies, and credentialing bodies, especially if sanctions and/or practice restrictions are involved.

A. Oral Reminder
This is a discussion between the Program Director and a resident concerning a minor or isolated performance deficiency. The objective is to correct the deficiency through a collegial discussion concerning how the resident’s performance falls short of what is expected and provide an explanation of what must be done to correct the deficiency.

B. Written Notification and Plan of Corrective Action
If the use of an oral reminder has not corrected the performance deficiency, such a reminder is impractical or inappropriate for the level of attention required, or if the deficiency is no longer an isolated matter, a written notification and RIP is warranted. The written notification portion formalizes the discussion between the program director and the resident concerning the performance deficiency. The RIP outlines a plan of corrective action, describes further monitoring and evaluation, and specifies any required practice restrictions, and describes the time frame and deadlines related to the action. The RIP’s terms may or may not require extension of training beyond the usual program requirements, but they will likely subject the resident to performance monitoring that is distinct from the level of monitoring experienced by other residents at the same post graduate year of training but who are not on a RIP.
1. Significant deficiencies that warrant Written Notification and Resident Improvement Plan may include, but are not limited to any of the following:
   a) Failure to meet performance standards set by the training program.
   b) Misconduct that infringes on the principles and guidelines set forth by the training program.
   c) Documented and recurrent failure to complete medical records in a timely and appropriate manner.
   d) Failure to meet the requirement to inform the Program Director of any professional employment outside the residency program or to comply with limitations established.
   e) Reasonably documented professional misconduct or ethical charges brought against a resident, which bear on his/her fitness to participate in the training program or patient care.
   f) Failure to comply with University’s compliance program, University policy, or the provision of safe and effective patient care.
   g) Failure to participate in required institutional risk management training, health screening, and OSHA training.

2. The Written Notification and RIP shall be provided to the resident in a timely manner, usually within one week of the deficiency being investigated and confirmed. The Written Notification portion must clearly describe both the performance deficiency and the standards used to define the deficiency, and the RIP portion must then set forth a clear set of expectations for future performance.

3. The Written Notification and RIP will also establish a reasonable length of time in which the resident must correct the deficiency and clearly identify any practice restrictions required during that period. If the RIP extends the expected length of residency training or affects the resident’s eligibility for taking certification examinations or making application for additional training, those consequences should also be specifically stated.

4. A copy of the Written Notification and RIP will be placed in the resident’s file and provided to the DIO.

5. Depending on compliance with the RIP and the duration of the RIP, the resident may, at the end of the established time period, be:
   a. reinstated to the program without further corrective action,
   b. continued on a plan of corrective action with or without restrictions,
   c. ineligible for promotion with the possibility that duration of training will require extension,
   d. placed on Suspension,
   e. notified of Non-Renewal of Residency Agreement, or
   f. terminated from the residency program.
C. Suspension

1. A resident may be suspended from a residency program for reasons including but not limited to any of the following:
   a. any of the reasons listed in paragraphs B. la-1g,
   b. failure to meet the requirements of a Written Notification and RIP, pending determination of further action,
   c. the resident is deemed an immediate danger to patients, himself or herself, or to others- pending further investigation/determination,
   d. failure to comply with the medical licensure laws of the State of Oklahoma - pending further investigation or appeal,
   e. failure to maintain required professional liability coverage as stipulated in the eligibility requirements of the College - pending further investigation or appeal,
   f. failure to obtain required licensure- pending licensure board action, or
   g. the resident is being investigated for suspected disruptive behavior, alcohol, or substance abuse – pending determination.

2. The Program Director shall provide the resident a written notice of Suspension, the reasons for the action, and the period of Suspension, and shall place a copy of the notice in the resident’s file and the DIO. If the Suspension extends the length of residency training or affects eligibility for taking specialty certification examinations or making application for additional training, those consequences should be specifically stated.

3. Suspension may be with or without pay, depending upon the circumstances.

4. Suspension must be followed by appropriate measures determined by the Program Director to assure satisfactory resolution of the issue(s). During Suspension, the resident may be removed from clinical activities, other regular duties, and/or educational conferences, as the Program Director deems appropriate.

5. Subsequent to a period of Suspension, a resident may be:
   a. reinstated without further corrective action,
   b. reinstated on a RIP with or without restrictions,
   c. reinstated with delay of promotion,
   d. continued for an additional period on suspension,
   e. notified of Non-Renewal of Residency Agreement, or
   f. terminated from the residency program.

6. Periods of Suspension must be appropriately and reasonably limited in duration, depending upon the reason(s) for the Suspension.

D. Termination

1. Termination from a residency program may occur for reasons including but not limited to any of the following:
   a. any of the reasons listed in paragraphs E la-1f,
   b. failure to meet the requirements of a Written Notification and RIP,
   c. failure to fully comply with the terms and conditions of suspension,
d. illegal conduct,
e. failure to comply with the medical licensure laws of the State of Oklahoma,
f. failure to maintain required professional liability coverage as stipulated in the eligibility requirements of the College of Medicine,
g. failure to pass required medical licensing exams and/or obtain required licensure,
h. participating in any type of moonlighting activities without the knowledge and prior written approval of the Program Director, or
i. failure to continue in a Physician Recovery Program as a part of an ongoing treatment plan.

2. At the time of notification of Termination to the resident, the Program Director shall provide the resident a written letter of Termination stating the reasons for such action and the date it becomes effective and shall place a copy of this notice in the resident’s file and forward one to the DIO.

**Grievances**

The University, through its designated officials, retains the right to make final determination as to the academic qualifications, performance evaluations, professional conduct, promotion, suitability for continued training, and certification of resident physicians participating in the University’s graduate medical education programs. This section defines the policies and procedures for resident grievances if a dispute arises.

**A. Definition of a Grievance**

1. An allegation of wrongful academic or other disciplinary action (e.g. failure of the Program Director to follow established policy or procedures) that has resulted in or could result in dismissal, non-renewal of a residency agreement, non-promotion to the next level of training, or other actions that could significantly threaten a resident’s intended career development and resulting in restriction of residency activity, failure to promote, suspension, or termination of residency training.

2. A formal request for adjudication of an unresolved complaint concerning work environment or issue related to the residency program and/or faculty, but specifically excluding complaints of discrimination, harassment of a sexual, racial, or other nature, or appropriate accommodation for disability that is investigated and addressed through University Equal Employment Opportunity policy and procedure.

3. Actions, including termination of residency training, resulting from a resident’s failure to comply with the requirements of the medical licensure laws of the State of Oklahoma or the University’s Compliance Program are not subject to the grievance procedure(s).
4. Actions resulting from a resident’s repeated failure to pass or failure to be eligible to take all of the requisite examinations for licensure to practice medicine in the United States, including termination of residency training on this basis, are not subject to the grievance procedure(s).

5. Actions resulting from a resident’s inability to maintain required professional liability insurance, including termination of residency training on this basis, are not subject to the grievance procedure.

B. Grievance Procedure
1. Residents who exercise their right to use this procedure agree to accept its conditions as outlined.

2. A resident may have a grievance only on the matters stated in Section A.1, and A.2 above.

3. The resident shall first discuss his/her grievance with the training Program Director and attempt to resolve the issue within the program. In order to pursue the right to file a grievance, this must occur within seven (7) University business days of the date on which the resident was notified by the Program Director of the action in question.

4. If the resident is unable to resolve the matter at the level of the Program Director and intends a formal grievance hearing, he/she must request a meeting with the Designated Institutional Official for the purpose of discussing his/her grievance. In order to pursue the right to file a grievance, this request must be in writing and must contain the specific grounds for filing the grievance. The request must be submitted within seven (7) University business days of the failed attempt to resolve the issue with the Program Director.

5. The Designated Institutional Official or designee shall meet with the resident to discuss his/her grievance in a timely manner.

6. The Designated Institutional Official shall attempt to resolve the grievance between the parties involved. Both parties will be notified in writing by the Designated Institutional Official of the resolution, or if he determines that the matter cannot be resolved.

7. Within seven (7) University business days of notification of the resident by the Designated Institutional Official that the matter cannot be resolved, the resident may request a grievance hearing by a Resident Appeals Committee. The request for a hearing shall be written and submitted to the Dean of the School of Community Medicine. If no appeal is filed within the seven (7) University business day period, the case is considered closed.

8. Upon receipt of a properly submitted request for a hearing, the Dean of the School of Community Medicine shall appoint an ad hoc Resident Appeals
Committee for the purpose of considering the specific grievance(s) of the resident physician.

9. The Resident Appeals Committee shall be composed of six (6) members: three (3) selected from the non-academic administrative faculty of the School of Community Medicine clinical departments and three (3) selected from residents within programs in the School of Community Medicine, other than the program in which the complainant is a resident. Committee members cannot be from the same department as the resident. The Chair of the Appeals Committee shall be selected by the Dean of the School of Community Medicine from the faculty members appointed and is a voting member. The parties shall be notified of the membership of the Committee and given the opportunity to object due to bias. Committee members with a conflict of interest will be replaced.

10. The Chair of the Resident Appeals Committee shall notify the parties of the date, time, and location of the hearing. Parties are responsible for (1) giving such notice to any witnesses whom they wish to call for testimony relevant to the matters in the grievance, and (2) arranging for participation of witnesses in the hearing. The hearing shall be scheduled to ensure reasonably that the complainant, respondent, and essential witnesses are able to participate. Administrative support will be provided by the GME Office to the Chair of the Appeals Committee to maintain the agenda, make copies of documents, manage the witness list, arrange for audio recording, reserve adequate meeting space, and provide other support services at the discretion of the Chair of the Resident Appeals Committee.

11. The resident may be advised by legal counsel at his/her own expense. If the resident intends to have legal counsel present at the hearing, the resident must notify the Chair of Appeals Committee in writing at least fifteen (15) University business days prior to the Appeals Committee hearing. Legal counsel for the complainant and the respondent may advise their clients at the hearing but may not directly address the Appeals Committee or witnesses. Legal Counsel for the University may advise the Appeals Committee at the request of the Chair.

12. If the resident is accompanied by legal counsel at the hearing or, if permitted by the Chair of Appeals Committee at any prior steps where the resident and University official(s) meet, University legal counsel representing the faculty members or the Program Director shall also be present.

13. The parties shall each submit a list of the witnesses to be called, including a brief description of the expected testimony, and the actual exhibits to be presented at the hearing to the Chair of Appeals Committee at least seven (7) University business in advance of the hearing. The seven (7) University business day deadline is subject to revision by the Appeals Committee Chair. The parties are responsible for acquiring evidence and requesting witnesses' attendance. The list of witnesses and copies of exhibits from each party will be
provided to the Appeals Committee Chair, who shall make them available to the other party. In the event either party objects to the listed witnesses or exhibits, the party shall make such objection to the Appeals Committee Chair in writing at least (3) University business days prior to the hearing. The Chair shall make a determination regarding any objections and shall notify the parties in writing prior to the hearing.

14. In the event the grievance is resolved to the satisfaction of all parties prior to the hearing, a written statement prepared by the Chair shall indicate the agreement that has been reached by the parties and shall be signed and dated by each party and by the Chair of the Appeals Committee. This agreement shall be filed with the Dean of the School of Community Medicine. A copy of the final decision shall also be included in the resident’s file and forwarded to the Designated Institutional Official for the administrative file maintained in the Graduate Medical Education Office.

15. If no resolution is agreed upon, the Resident Appeals Committee shall hear the grievance. The Committee Chair shall determine the procedure and conduct of the hearing. The hearing shall be closed. The hearing shall be recorded, and copies of the recording will be provided to the parties upon request.
   a) Witnesses will be asked to affirm that their testimony will be truthful.
   b) Witnesses other than the complainant and the respondent shall be excluded from the hearing during the testimony of other witnesses. All parties and witnesses shall be excluded during the deliberations of the Appeals Committee.
   c) Burden of proof is upon the complainant to convince a majority of the Appeals Committee that his/her allegation is true by a preponderance of the evidence.
   d) Formal rules of evidence shall not apply.
   e) The parties will have reasonable opportunity to question witnesses and present information and argument deemed relevant by the Appeals Committee Chair.
   f) Committee members may also question parties and witnesses.
   g) Final decisions by the Appeals Committee shall be by majority vote of the members present and voting.

16. The Appeals Committee shall render a signed, written report of its findings and recommendations to the Dean of the School of Community Medicine. The Committee’s report shall be prepared by the Chair and transmitted within seven (7) University business days after conclusion of its deliberations.

17. The Dean of the School of Community Medicine shall review the findings and recommendations of the Appeals Committee and render a final decision regarding the grievance and appropriate action. Within fifteen (15) University business days of receipt of the Appeals Committee’s findings and recommendations, the Dean shall inform the resident and the Program Director of the
findings of the Appeals Committee and of the Dean's decision. A copy of the Dean's decision shall be transmitted to the Chair of the Appeals Committee and to the Designated Institutional Official to be placed in the resident's administrative file maintained in the Graduate Medical Education Office.
