**EM 9101/EM9990 Emergency Medicine**
Prerequisite: 4th year medical student                  Number of weeks offered: 4

**FP 9580 Family Medicine- Ambulatory Medicine**
Family practice outpatient experience gives students the opportunity to function as the primary care physician with faculty supervision. The student will become more familiar with and use office equipment and learn to perform a variety of procedures (hospital/out patient) with supervision.
Prerequisite: 4th year medical student                  Number of weeks offered: 2, 4

**FP 9596 Family Medicine Sub-Internship**
Students serve as a sub-intern. Responsibilities include patient care under the supervision of the senior resident and faculty. Post hospital follow-up will be in the out patient clinic.
Prerequisite: 4th year medical student                  Number of weeks offered: 2, 4

**GYOB 9232 OB/Gyn Sub-Internship**
Elective is tailored to individual student needs, making use of various facilities and resources available in the areas of ambulatory gynecology, family planning, high-risk obstetrics, teenage pregnancy, community ob/gyn and office ob/gyn.
Prerequisite: 4th year medical student                  Number of weeks offered: 4

**MED 9236 Medicine/Pediatrics**
The purpose of this course is to provide medical students with exposure to the scope of combined Med/Ped practice through a combination of inpatient and ambulatory experiences.
Prerequisite: 4th year medical student                  Number of weeks offered: 4

**MED 9235 Advanced Internal Medicine (Cardiology)**
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student                  Number of weeks offered: 4
MED 9325 Advanced Internal Medicine (Endocrinology)
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student    Number of weeks offered: 4

MED 9325 Advanced Internal Medicine (Gastroenterology)
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student    Number of weeks offered: 4

MED 9325 Advanced Internal Medicine (Hematology/Oncology)
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student    Number of weeks offered: 4

MED 9325 Advanced Internal Medicine (ICU)
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student    Number of weeks offered: 4

MED 9325 Advanced Internal Medicine (Infectious Disease)
Not offered in March. Requires 2 months notice with prior approval.
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student    Number of weeks offered: 4

MED 9325 Advanced Internal Medicine (Nephrology)
This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.
Prerequisite: 4th year medical student    Number of weeks offered: 4
**MED 9325 Advanced Internal Medicine (Pulmonary)**

This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.

Prerequisite: 4th year medical student        Number of weeks offered: 4

**MED 9325 Advanced Internal Medicine General Medicine In-Patient (Sub-Internship)**

This course provides the opportunity to explore one of more content areas by focusing on a defined clinical experience and the student’s specific learning objectives.

Prerequisite: 4th year medical student        Number of weeks offered: 4

**PEDI 9671 Developmental Pediatrics**

The developmental behavior of infants and toddlers and the assessment of the normality of behavior in young pediatric patients are the focus of this largely outpatient experience in a large developmental assessment and treatment center in a multi-disciplinary setting.

Prerequisite: 4th year medical student        Number of weeks offered: 4

**PEDI 9672 Perinatal Medicine**

Various aspects of neonatal intensive care and general principles for the health care of newborn infants, and common problems concerning the neonatal morbidity and mortality are the focus of this course.

Prerequisite: 4th year medical student        Number of weeks offered: 4

**PEDI 9673 Pediatric Intensive Care Unit**

Course offers a clinical experience in patient care learning principles of respiratory and cardiovascular resuscitation and support, the management of fluid and electrolyte and life-threatening infectious disease, neurological and metabolic problems, including head trauma.

Prerequisite: 4th year medical student        Number of weeks offered: 4

**PEDI 9674 Pediatric Sub-Internship**

A training experience modeled after a pediatric internship. Work under the direct supervision of a senior pediatric resident and faculty pediatrician, performing histories and physicals; develop
management plans, write orders for counter signature, initiate progress reports, appropriate laboratory
data, perform various procedures and interpret laboratory management plans to parents/patients.

Prerequisite: 4th year medical student Number of weeks offered: 4

**PEDI 9675 Pediatric Endocrinology**

The conceptual and clinical aspects of endocrine growth and development as well as pediatric endocrine
problems. This course involves outpatients and inpatients, directly managed and consultative; includes
exposure to departmental research activities.

Prerequisite: 4th year medical student Number of weeks offered: 4

**PEDI 9676 Clinical Genetics**

All aspects of clinical genetics- The techniques of genetic laboratory diagnosis and evaluation, the
indications for genetic analysis, and the techniques of genetic counseling. Student will participate with
various member so the division both in the clinical and laboratory assessment of potential genetics
problems and in the counseling aspects of such problems. A project will be given

Prerequisite: 4th year medical student Number of weeks offered: 4

**NUMBER NOT YET KNOWN Pediatric Cardiology**

Prerequisite: 4th year medical student Number of weeks offered: 4

**PEDI 9678 Pediatric Gastroenterology**

Experience in gastrointestinal disorders, liver disease and feeding problems (including enteral and
parenteral nutrition) in infancy and childhood.

Prerequisite: 4th year medical student Number of weeks offered: 4

**PEDI 9681 Child Protection & Forensic Pediatrics**

Exposure to field of child abuse medical evaluations. The Tulsa Children’s Justice Center is the central
site for medical examinations and interaction with other team members from the Tulsa Police
Department, DHS, the District Attorney’s office and the Child Abuse Network. Students will interview
allegedly abused children, perform examinations with supervision and participate in case reviews and

This course will expose students to a variety of agencies offering services to adults and children involved in some form of family violence. It also offers students an opportunity to observe/participate in programs for alternative education and behavioral therapy.

Prerequisite: 4th year medical student  
Number of weeks offered: 2, 4

---

**PEDI 9685 Pediatric Clinic**

A training experience working under the direct supervision of a senior pediatric resident and faculty pediatrician, performing histories/physicals; develop management plans, write orders for counter signature, initiate progress reports, appropriate laboratory data, perform various procedures and interpret laboratory data, perform various procedures and interpret laboratory management plans to parents.

Prerequisite: 4th year medical student  
Number of weeks offered: 4

---

**PSBS 9542 Child and Family Psychiatry**

Observation and interaction with children and adolescents in a variety of settings.

Prerequisite: 4th year medical student  
Number of weeks offered: 2, 4

---

**PSBS 9543 Consultative Psychiatry**

Focuses on inpatient and outpatient psychiatric consultation in three patient care settings. Educational experiences occur in conjunction with a resident in psychiatry. Special reading assignments will be coordinated by the attending and students are encouraged to participate in Consultation Research with the attending.

Prerequisite: 4th year medical student  
Number of weeks offered: 2, 4
**SURG 9782 GENERAL SURGERY SUB-INTERNSHIP**

*Prerequisite: Surgery Clerkship*

Rotation is done at St. John Medical Center or Saint Francis Hospital (trauma). Exposure to the multiple aspects of general surgery, thoracic, and peripheral vascular surgery. Management of major surgical patients, including intensive care and participation in critically ill cases.

Year in Program: 4  
# of Weeks: 4

**SURG 9783 THORACIC AND CARDIOVASCULAR SURGERY**

*Prerequisite: Surgery Clerkship*

The surgery principles of thoracic and cardiovascular surgery, with emphasis on physical examination, detailed review of cineangiograms, and peripheral vascular arteriograms.

Year in Program: 4  
# of Weeks: 4

**SURG 9784 PLASTIC SURGERY**

*Prerequisite: Surgery Clerkship*

A preceptorial surgical experience in plastic surgery.

Year in Program: 4  
# of Weeks: 4

**SURG 9785 SURGICAL EXTERNSHIP - TULSA BURN CENTER**

*Prerequisites: Surgery, Medicine and Pediatric Clerkships*

A clinical experience in an acute care burn unit.

Year in Program: 4  
# of Weeks: 4

**SURG 9787 SURGICAL PATHOLOGY**

*Prerequisite: Surgery Clerkship*

A preceptorial surgical experience in surgical pathology.

Year in Program: 4  
# of Weeks: 4
