

# New class for Fall 2013

***Fulfills Natural Science Gen-Ed Requirement***

## GEOL 3013 The Geology of Oklahoma

This course will provide an integrated overview of geology emphasizing earth materials, surface processes, natural hazards, and earth's evolution using Oklahoma as our natural laboratory. The course will also focus on societal aspects of human-induced changes to this natural system as well as issues surrounding resource extraction.

*Dr. Mike Soreghan*

*Time: MW 1:30-2:45 in Sarkeys Energy Center 1446.*
