Program Student Learning Outcomes

College: Arts & Science
Program: Biology, BS

- Students completing a BS in Biology will compare favorably to students from other institutions in basic knowledge of major areas of modern animal biology.

- Graduates will be prepared to succeed in post-graduate professional training or in careers related to science.

- Our students should be able to find, read, and evaluate the work of scholars in biology and interpret their findings and views to professional biologists and their peers orally and in writing.
