Program Student Learning Outcomes

College:  Earth & Energy  
Program:  Geophysics, MS

Graduates of the MS in Geophysics program should be able to:

- Demonstrate scientific competence in the core discipline so they can become productive scientists in their chosen profession.

- Demonstrate a broad knowledge of the diverse field of Earth Sciences.

- Demonstrate technical skills in computer, laboratory and/or field measurements necessary to be productive scientists.

- Observe, measure, collect, and/or interpret data from field study, databases, experiments, and other sources of information.

- Apply the scientific method, and critically/creatively solve geologic problems.

- Communicate effectively in oral presentations and in written form, including the thesis or dissertation.

- Contribute to scientific knowledge, instruments or methods of analysis.
