Is Pleased to Announce a Seminar
Presented By

Dr. James M. Boncella
Los Alamos National Laboratory

“Addition of H-X to manganese amide bonds: Catalysts for formic acid decomposition and the aldehyde water shift reaction”

Friday, October 21, 2016
At
2:30 p.m.
Astellas Conference Room
SLSRC 3410/3430

This seminar will discuss the development of catalysts that convert aldehydes and water into carboxylic acids and hydrogen, which has relevance to hydrogen production for fuel cell applications.

Refreshments will be served at 2:15 p.m.
