THE ARRIVAL OF SOCIAL SCIENCE GENOMICS

Dr. Jeremy Freese, Stanford University

Jeremy Freese is a professor of Sociology at Stanford University where he studies differences in physical health, cognitive functioning, and the role of knowledge and innovations in producing social disadvantage. He is the co-principal investigator of the General Social Survey, Time-Sharing Experiment in the Social Sciences, and Wisconsin Longitudinal Survey. He is the co-leader of the Health Disparities Working Group for the Stanford Center for Population Health Sciences and co-authored the widely used book Regression Models for Categorical Dependent Variables Using Stata (with J. Scott Long).

GAYLORD HALL CONFERENCE ROOM 1140
