**Evaluation Instrument SWK 5826**

The following evaluation instrument is built into the education contract. This design should assist field instructors as they provide students with ongoing feedback about their performance. When preceptors have been included in the plan for practicum supervision, their feedback must somehow be incorporated into this process.

Although feedback and evaluation are best as an ongoing dialogue, all placements have two (2) official grading periods, one for each course. In full time (block) placements, students receive two final grades for the practicum within one semester, one at mid-practicum and the other at the end of the practicum. In two semester placements, students receive final grades at the end of two consecutive semesters. All evaluations are referred to as the Final Evaluation.

At the end of each evaluation period the field instructor and student jointly review the student’s performance within nine (9) competency areas in terms of the criteria specified in the field contract. The field instructor then assigns official Evaluation Instrument ratings for the practice tasks included under each competency. These ratings must be based on actual performance of the specified criteria, as opposed to anticipated progress during the remainder of the practicum. The field instructor provides a narrative description of “evidence to support” all final ratings. Student and instructor together can develop “strategies to increase competence,” i.e. ways in which practice behaviors and ratings can be further improved. These strategies can actually be developed and recorded throughout the practicum. In this way, feedback and improvement planning can be structured into ongoing development of the education contract, and new ideas can be generated to offer the student the best possible chance to succeed in the practicum. When warranted (see Practicum Grading Policy in the Field Practicum Manual) strategies to increase competence must be developed more formally by the field instructor and faculty field liaison as a school-required Performance Improvement Plan and included in the Evaluation of Student Performance narrative which appears at the end of the Field Practicum Contract.

On the scale provided after each practice behavior, please indicate level of performance by selecting the appropriate value.

**AC  Advanced Competence**  
Expertly demonstrates awareness, knowledge and skills as a social work intern.

**C  Competence**  
Consistently demonstrates awareness, knowledge and skills as a social work intern.
EC  Emerging Competence
  Demonstrates beginning awareness, knowledge and skills as a social work intern.

IP  Insufficient Progress
  Rarely demonstrates awareness, knowledge and skills as a social work intern.

UP  Unacceptable Progress
  Never demonstrates awareness, knowledge and skills as a social work intern.

* The structure of this evaluation instrument and the rating scale were developed by the Office of Field Education at the University of Texas, Austin.
This section of the Contract includes competencies which establish guidelines for the student's professional approach to the practicum experience. It offers ways that a student may take advantage of the mentoring relationship in the practicum. And, it helps the student situate the practicum in a social services context and begin exploring what it means to be a professional social worker.

All social work students must be familiar with and are bound by the provisions of the University of Oklahoma Anne & Henry Zarrow School of Social Work Student Performance Policy. Included in this policy are standards for professional behavior which must be incorporated into and met this practicum.

**A-2 DEMONSTRATE ETHICAL AND PROFESSIONAL BEHAVIOR**

**Behaviors:**

- Actively seek feedback and supervision, and engage in personal reflection and self-correction.
- Practice with cultural humility that demonstrates recognition of and ability to utilize the principles included in the NASW Code of Ethics, evidence-based knowledge, and relevant legal and policy-related information.
- Represents agency and/or organization in a professional manner in multiple contexts.
- Demonstrates competency at an advanced level in verbal, written, and electronic communication in the process of managing professional duties, responsibilities, and appearance.

### I-2 EVALUATE PRACTICE WITH INDIVIDUALS, FAMILIES, GROUPS, ORGANIZATIONS AND COMMUNITIES

#### Behaviors:

- Use the scientific method as a guide when designing culturally responsive methods for the evaluation of processes and outcomes.

- Continuously seek, critically consume, and apply evaluation based evidence from the scholarly literature to inform and evaluate practice.

- Apply ethical principles when evaluation is conducted to ensure the protection and dignity of individuals, families, groups, organizations, and communities.

- Provide leadership in effecting sustainable changes in service delivery through the use of evaluation.

- Collaborate with clients and stakeholders on evaluation of interventions and/or assessment of practice outcomes.

The school is interested in measuring the impact of the work completed by practicum students. By this we mean, direct impacts this student has had on **individuals**, the **organization/agency**, and the **community**. Please take a moment to list the top three impacts you think this student has had in one or all of these domains. If you would provide a short narrative describing the specific nature of the impact, it would be very helpful.

**Individuals** (Examples include, but are not limited to the following: (Clients, staff, colleagues, community members, stakeholders, and/or elected officials):

Did the student directly lead/co-lead or take primary ownership over any of these activities involving individuals? If so, please explain (ex: student completed 10 successful intakes for new clients of the agency.)

**Organization** (Examples include, but are not limited to the following: Newly created or refined programs, generated professional agency reports, organizational assessment, fund development, policy and procedural changes, trainings and workshops).

Did the student directly lead/co-lead or take primary ownership over any of these activities involving the organization? If so, please explain (ex: student was the primary author on two agency reports involving assessment and program evaluation that were used to inform funding opportunities and strategic plans.)

**Community and Broader Impact**: (Examples include, but are not limited to the following: Policy advocacy, community inclusion and engagement, community events, neighborhood development efforts, voter registration, participation on community level coalitions, groups, boards, etc., trainings, workshops, and other events geared towards community participation).

Did the student directly lead/co-lead or take primary ownership over any of these activities involving communities and broader level systems? If so, please explain (Student registered 50 people to vote in ward 5 of Oklahoma City.)
II. Summary of Student Achievement
