Course Title:
Seminar in Resource and Environmental Geography: International Dimensions of Biodiversity Conservation

Course Number:
GEOG 6240-221

Course Description:
In this course, we will discuss the principles of conservation biogeography and how their application. The goal of this course is to enhance students understanding of science behind international treaties such as the Migratory Bird Treaty Act, Convention on International Trade in Endangered Species (CITES), the Convention on Wetlands of International Importance (or the Ramsar Conventions) and others.

Class Dates, Location and Hours:
- Dates: December 3 - 8, 2013
- Location: Classes held at Building 2784, Room 301, Kapaun Air Station on Vogelweh Air Base.
- Hours: Tue-Fri 6:00-9:30 p.m.; Sat-Sun 8:30 a.m.-4:30 p.m.
- Last day to enroll or drop without penalty: November 4, 2013

Site Director:
Kendra Burnside. Assistant: Janee LeFrere. Phone: DSN 480-6807, Civilian 06371-47-6807; Fax: 06371-479839; E-mail: apramstein@ou.edu

Professor Contact Information:
- Course Professor: Bruce Hoagland, Ph.D.
- Mailing Address: Department of Geography
  University of Oklahoma
  Norman, OK 73019
- Telephone Number: (405) 325-1985
- Fax Number: (405) 325-7702
- E-mail Address: bhoagland@ou.edu
- Professor availability: The professor will be available via e-mail to students before and after the class sessions. On-site office hours are half an hour before and after each class session, by appointment.

Textbook(s) and Instructional Materials:
Student materials are available at the OU Follett Bookstore located at 1185 Asp Avenue; Norman, OK. Orders can be placed online at www.oklahoma.bkstr.com. Faxed orders may be placed 24 hours a day at (405) 325-7770. Representatives are available by phone at (405) 325-3511 or (800) 522-0772 (toll-free) or E-mail at 0831mgr@fheg.follett.com from 8 a.m. to 6 p.m. Monday through Thursday; 8 a.m. to 5 p.m. on Friday; and 10 a.m. to 4 p.m. on Saturday (CST). Summer hours: 9 a.m. to 5 p.m. Monday through Friday (CST). (Text prices are available online.)

Course Objectives:
This course will provide the student with a working knowledge of key concepts in the discipline of biogeography and how those concepts are employed to conserve plant and animal species.

Course Outline:
I. Introduction
II. What are species and many how many are there?
III. Where do species occur?
IV. Extinction and the conservation of species

Assignments, Grading and Due Dates:

Reading:
Students are expected to have read David Quammen’s Song of the Dodo prior to the first day of class. Quammen’s book presents an excellent framework for understanding the historical development of biogeography as well as an overview of current challenges for species conservation.

Essay and Presentation:
Essay and class presentation grades are intertwined. The essay is solely for my edification, but the presentation allows you the opportunity to share what has been learned with your classmates.

The essay will be five pages in length and include at least five literature citations (not included in the page count). Literature citations should come from pertinent sources, such as primary literature and books. In general, I suggest you avoid web sites other than those for government agencies, conservation organizations, or research institutes. Wikipedia will not be counted as a literature source. Figures, including maps and photographs, are highly recommended and should be placed at the end of the essay with an appropriate caption. (Figures are not included in the page count). All essays must consist of a title, the student's name, and pagination. Points will be deducted for each missing item. A draft of the essay will be due the first day of class. I will open a dropbox on D2L titled "essay draft." Please title the file in this format: yourlastname_essay.docx. We will discuss essay structure and content on the first night and you will be allowed to edit your essay accordingly. The final version of the essay will be due the last day of class.

Students may select a topic from Dodo or choose a species from the CITES Red Book (www.cites.org/). Student paper topics from previous classes have included the impact of non-native species on native biota, the impact of habitat fragmentation, extinction of plant or animal species, the development of the theory of Island Biogeography, International Conservation Policy, the SLOSS debate, etc. I realize that most AP students do not have direct experience in the arena of conservation science; so I encourage you to contact me for confirmation that a chosen topic is acceptable.

The class presentation is a summary of the essay topic that you develop for your peers. Presentations can be presented as either as PowerPoint or posters. If your topic involves a particular plant, animal, and/or geographic region, please provide an illustration of the organism and a map of its distribution. A presentation schedule will be developed during the first day of class.

Exams:
Exams will consist of short essay questions based upon the topics covered in class and the readings. Exam 1 is scheduled for the evening of November 1 and exam 2 the afternoon of November 3. Both exams will be take home exams.
Grading:
This is a letter-graded course: A, B, C, D, or F.

POLICIES AND NOTICES

Attendance/Grade Policy

Attendance and participation in interaction, individual assignments, group exercises, simulations, role playing, etc. are valuable aspects of any course because much of the learning comes from discussions in class with other students. It is expected that you attend all classes and be on time except for excused emergencies.

Excused absences are given for professor mandated activities or legally required activities such as emergencies or military assignments. Unavoidable personal emergencies, including (but not limited to) serious illness; delays in getting to class because of accidents, etc.; deaths and funerals, and hazardous road conditions will be excused.

If you are obtaining financial assistance (TA, STAP, FA, VA, Scholarship, etc.) to pay all or part of your tuition cost, you must follow your funding agency/institution’s policy regarding “I” (Incomplete) grades unless the timeline is longer than what the University policy allows then you must adhere to the University policy.

Students who receive Financial Aid must resolve/complete any “I” (Incomplete) grades by the end of the term or he/she may be placed on “financial aid probation.” If the “I” grade is not resolved/completed by the end of the following term, the student’s Financial Aid may be suspended make the student ineligible for further Financial Aid.

Students are responsible for meeting the guidelines of Tuition Assistance and Veterans Assistance. See the education counselor at your local education center for a complete description of your TA or VA requirements.

Academic Honesty

Honesty is a fundamental precept in all academic activities and … [you] have a special obligation to observe the highest standards of honesty. Academic misconduct in any form is inimical to the purposes and functions of the University and is therefore unacceptable and is rigorously proscribed. Academic misconduct includes:

- cheating (using unauthorized materials, information, or study aids in any academic exercise), plagiarism, falsification of records, unauthorized possession of examinations, intimidation, and any and all other actions that may improperly affect the evaluation of a student’s academic performance or achievement; assisting others in any such act; or attempting to engage in such acts.

All acts of academic misconduct will be reported and adjudicated as prescribed by the student code of the University of Oklahoma. All students should review the “Student’s Guide to Academic Integrity” found at http://www.ou.edu/provost/integrity

Accommodation Statement

The College of Continuing Education [Advanced Programs] is committed to making its activities as accessible as possible. For accommodations on the basis of disability, please contact your OU Site Director.

Course Policies

Advanced Programs policy is to order books in paperback if available. Courses, dates, and professors are subject to change. Please check with your OU Site Director. Students should retain a copy of any assignments that are mailed to the professor for the course. Advanced Programs does not provide duplicating services or office supplies.

INSTRUCTOR VITA

Bruce W. Hoagland, Ph.D.

Education

- 1995 Ph.D., Botany; University of Oklahoma; Norman
- 1990 M.S., Ecology; Eastern Kentucky University; Richmond
- 1986 B.A., Biology; University of Louisville; Louisville, Kentucky.

Current Positions

- Professor of Geography
- Coordinator, Oklahoma Natural Heritage Inventory
- Adjunct Professor of Botany

Frequently Taught Advanced Programs Courses

- GEOG 5113-220 Quantitative Methods in Geographical Research
- GEOG 6240-221 Seminar in Resource and Environmental Geography: Biogeography and Conservation

Major Areas of Teaching and Research Interest

- Research: geography and conservation of vascular plants. Current research projects include use of 19th century land surveys to analyze land cover change, inventories of Oklahoma vascular plants, and phenology of trees in the Talamanca Mountains, Costa Rica.
- Teaching: Courses include Biogeography, Vegetation Ecology, and Geography of Oklahoma, and graduate seminars in vegetation analysis.

Representative Sample Publications and Presentations

Major Professional Affiliations

- Association of American Geographers
- Botanical Society of America
