Enrollment Services is pleased to announce an upgrade to the online enrollment system in oZONE for students for Fall 2014 enrollment, and for continued Summer 2014 enrollment and add/drop.

Students access this new system through the Enroll link on their Home tab or the Enroll and Add/Drop link on their Academics tab. If they wish, they may still use the old system by selecting the "Enroll (Old Format)" icon.

The new version offers students a much improved interface with the enrollment process:

- Improved display of schedule in calendar format.
- "Planning" is back as a feature to create trial schedules prior to your enrollment window opening.
- In the Class Search, Registration Add errors will appear all together instead of one at a time.
- If a student is trying to add a class, time conflicts are noted on sections in search results.

We think students will find the system to be very intuitive, but should they desire additional information and or instructions, we encourage them to go to the "How to Enroll and Look Up Classes" link on the Academics tab.

For now, faculty, staff, and advisors will continue to use the "Old" version of Enroll. The module which matches what the students currently have will be coming this summer.
