SIG-Core Afternoon Panel
2:45 – 3:45pm

**Topic Area:** Situated, Shared, Social, Distributed and Team Cognition

**Title:** Expanding Our Minds: The Role of Intrapersonal Cognition

**Questions:**

1. As the field of cognitive research expands into the realm of intrapersonal cognition, what are the implications for viewing cognition as a fundamentally social activity?

2. Incorporating a systems perspective, what we can learn from the study of how our intrapersonal thinking is shaped by culture, experience and context?

3. How do we elicit, organize, represent and interpret intrapersonal cognition?

4. What are the challenges facing researchers in the area of distributed and team cognition?

5. How should I be positioning my work (inter or intrapersonal cognition) to gain broad appeal to the IS audience?

6. What are the fruitful areas for future research in the area of intrapersonal cognition?

7. Is interpersonal (individual) level cognition still a fruitful area of research?
