The Infrastructure Committee is a standing committee of the School of Library and Information Studies. The Infrastructure Committee serves in advisory capacity in the areas of technology and systems designed to support the work of staff and faculty in addressing the School’s goals and objectives. It coordinates administrative and academic computing policies and procedures within the School. The Committee makes recommendations to the faculty and Director relative to the design and structure of document systems, information technology and use policy, and computer technology for teaching and administrative support.

Membership: 3 faculty members, 1 student, 1 staff member

For 2007-2008, the Infrastructure Committee is specifically requested to accomplish the following. In addressing these specific charges, it is expected that input will be sought from faculty and students.

1. Review the policy for the SLIS web site and make recommendations to the faculty for its revision.
2. Review the SLIS General Principles for Records Management; make recommendations to the faculty for its revision.
3. Evaluate the SLIS web site; make specific recommendations to the director for its improvement.
4. Review the 2006 restructuring of SLIS documents on the SLIS server and make recommendations to the Director.
5. Identify and report to the faculty and Director hardware and software needs for the support of SLIS teaching, research, and service.
6. Review the revised VMGO in light of the Committee’s responsibilities and make recommendations to the faculty for program improvement.
