ADDENDUM # 1 DATED 10/30/09

Question #1: Under the Specifications sections, it is mentioned that the software will have to have the capability to "Receive medication once the medications are received from the manufacturer." Can you explain that a little bit further? What exactly do you mean?

Answer #1: That means we need to be able to enter into the database the receipt of medication when we receive it from a manufacturer. Kind of like a check in service.
