

Maintain a Comfortable Living Environment – Couch Center

We understand the desire to decorate and make the most of your space. However, in order to maintain a comfortable living environment, you need to keep pathways clear and avoid blocking vents. This will help ensure your safety and allow Housing Operations to address any issues quickly.

Please closely follow the checklist below:

- Remove any items you may be storing on top of the Fan Coil Unit (FCU).
- Remove any items that may be obstructing the FCU.
- Move all furniture and any personal items at least 12" away from all sides of the FCU air vents so there is enough clearance for maintenance staff to service.
