

Be sure to register your bicycle with OUPD

You can register "in-person" year-round at the "walk-in" registration locations listed below. For a walk-in registration, you'll complete an official Bicycle Registration Form at the time of registration. The bike owner (or parent in the case of a minor) will be asked for verifiable identification.

Your bicycle must have a permanent serial number to be registered.

Bicycle Lock Information

Choose the right level of security

The ultimate job of any lock is to stop your bike from being stolen. (Yeah OK, that's obvious, right?). So, the first and most crucial step is to think about what level of protection you'll need.

Questions	High Risk	Lower Risk
Where do you live?	Big Town, City or University campus	Small town
Does your bike attract second looks?	Yes	No
How long do you leave your bike unattended?	More than 1 hour	Less than 1 hour

Bike locks vs Bolt cutters

Chain links and U-lock shackles with diameters of less than 13 mm can be cut with medium sized bolt cutters, which many bike thieves will use.

Locks with diameters between 13 and 15 mm can only be cut by the very biggest bolt cutters. But there are thieves that use these tools too.

But at 16 mm thickness, chain links and U-lock shackles become impossible to cut with any manual bolt cutters.

The important qualities of bike locks

DO NOT BUY A CABLE LOCK!

Bike thieves specifically target these locks and in fact, some reports suggest that 90% of all stolen bikes were secured with cable locks.
