

PARKING AND TRANSPORTATION SERVICES

The UNIVERSITY of OKLAHOMA

New Parking Garage Planned

OU Parking Services is excited to announce a new five-level parking garage at the intersection of College Avenue and Cruce Street as part of ongoing efforts to modernize parking operations and better align campus infrastructure with the changing needs of the OU community. The garage is expected to provide more than 650 spaces, adding parking for Commuter students and Faculty/Staff. Construction is slated to begin in 2027.

Parking Plan During Construction

The site of the new garage is an existing Faculty/Staff lot that has 180 spaces. During construction, employees who previously parked in that lot will have parking available nearby (possibly Elm garage or Boyd Street). Also, more Commuter student parking will be opened up in the Jenkins garage to accommodate all user groups displaced during construction.

Project Details

Location: College Avenue and Cruce Street, at the current A5 Lot west of the Charles B. Goddard Health Center and Burton Hall

Projected size: Five levels and approximately 240,000 square feet

Projected parking spaces: More than 650

Project status: Early in the design process

Construction start: 2027
