Did you know that OU is offering a brand-new online class in the Janux system that will help you to achieve this goal? Enroll now in "CS 1300: The Power and Elegance of Computational Thinking!"

CS 1300 is a one-unit class designed to teach you the beginnings of thinking computationally and logically. You will learn to program using a graphical language called Snap and you will also discuss the impact that computing has had on society. The class is fully online and is one of the featured classes in the new Janux system. You can preview the video at janux.ou.edu

Science, technology, engineering, and mathematics skills are critical to success in almost any job to-day. Computer Science graduates are always in demand on the job market as there is a consistent need for talented students. CS jobs also pay well, with an average starting salary of $60,000.

During your lifetime, people who use the power and elegance of computational thinking have revolutionized the world. We are on the tip of another technology revolution and we would like for you to join us!
