HSCI 2443: Science in a Religious World: Global Perspectives -- Spring 2012

Mondays and Wednesdays 3:00-4:15
Zarrow Hall 115

In this class we’ll discuss:

...why Victorian physicists were interested in spiritualism,

...what the Dalai Lama learned from brain wave studies of meditating monks,

...how some theologians have portrayed evolution as Christianity’s salvation,

...whether atheists or fundamentalists are more “eco-friendly.”

And many more interesting ideas from the recent history of science-religion interactions around the world.

Satisfies the Western Civ Core Course requirement.
