In October's Safety Corner we want to make sure all our pilots and controllers are aware of the great online safety courses offered by the Aircraft Owners and Pilots Association (AOPA) Air Safety Institute.

If you click the link below, it will take you to the page listing all of AOPA's online courses—most only take 30 minutes to an hour to complete. They are excellent, and we suggest you try **Stalls and Aerodynamics** or **VFR into inadvertent IFR**.

The point of taking these courses is to continually learn and chair-fly with real experiences.

An advantage of AOPA courses is they typically use ATC tapes and very good graphics to help you reexamine the concepts and give you an engaging learning experience.

Don't forget you can become a free member of AOPA for six months by simply going to the link below and selecting view all memberships in the membership tab. Then select student trial.
