

The UNIVERSITY of OKLAHOMA
College of Atmospheric and Geographic Sciences

Memorandum

To: Office of the Registrar
From: SoA and AGS Advising Team
Date: March 2nd, 2026
Subject: SoA Standard Petition 6 - METR

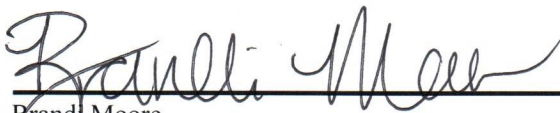

To Whom It May Concern:

This memorandum serves as a blanket petition to establish a process for waiving specific Bachelor of Science in Aviation coursework for students who are also pursuing a Bachelor of Science in Meteorology.

The Bachelor of Science in Aviation coursework for all Aviation programs requires two courses (METR 1014 and METR 2603, for a total of 7 credits hour in METR). This requirement is to ensure students have a good understanding of meteorology, weather and climate. The coursework of the Bachelor of Science in Meteorology program sufficiently provides this understanding, as such:

1. It is recommended that students who have successfully completed METR 1003, *Introduction to the Atmospheric Sciences*, receive a **waiver** for **METR 2603 – Severe and Unusual Weather**.
2. It is further recommended that students who have completed METR 2004, *Atmospheric Circulations*, receive a **waiver** for **METR 1014 – Introduction to Weather and Climate**.

Upon approval and signature, this petition will be used as the standing guideline for applying these waivers to all applicable student records. The finalized document will be stored in Laserfiche to ensure secure access, proper documentation, and long-term institutional consistency.
