

# ANTH 5893-001: Geophysics in Archaeology

The course will explore the development and application of geophysical prospection techniques in archaeology. Emphasis will be on theory and method, but also will include a strong hand-on learning component with regular class activities designed to better understand the workings, application, and post-collection data processing of the various methods.

**Mondays 12:00-2:40pm**

Location: Oklahoma Archaeological Survey

111 Chesapeake St., Norman, OK, 73019

**Fall 2023**
