Student Update re: Changes Due to CV-19

Dear Students,

We are currently experiencing a global event that has presented collective challenges for individuals, families, communities, institutions and governments worldwide. The school must respond to an ever-changing landscape while simultaneously maintaining the educational process and helping students complete their degrees. Thank you all for your continued patience and support of the faculty and staff as we continue to monitor and adapt to these challenges.

We know that some of our students have been exposed to the virus and have loved ones who are suffering, and everyone is experiencing stress. Please make sure that you engage in self-care, take breaks, and reach out for support as needed.

Please remember:

· If you have been exposed to or you are experiencing symptoms of CV 19, PLEASE contact your health care provider first.
· Following that, please call the OU Student/Employee Health Nurse Hotline numbers below to be screened by OU (Tulsa: 918-660-3102 and Norman: 405-325-8732).
· Please inform your field coordinator or program coordinator so we are aware of OU recommendations post-screening.
· Also – If you are experiencing problems or issues completing your coursework or practicum – please contact your program or field coordinator immediately! We are all here for you!

Please stay in touch with the school and remain vigilant to our communications and updates.

I hope this email finds you all remaining safe and healthy. The world is experiencing an unprecedented event and please know that we are all here for you and know that any of you can ask for assistance at any time.

Sincerely,

Julie Miller-Cribbs, Ph.D.
Director and Professor
