

OU POLYTECHNIC INSTITUTE

At the OU Polytechnic Institute (OUPPI), we don't just teach tech—we live it. With hands-on learning, real-world projects, and deep industry connections, you'll be ready to launch your career the day you graduate. Our cutting-edge programs are designed with corporate partners and taught by faculty with more than 200 years of combined industry experience. You can start a four-year degree on the OU-Norman campus or complete your junior and senior years in Tulsa through our bachelor's degree completion programs. And with our 4+1 options on both campuses, you can earn a master's degree with just one extra year.

Building community through connection — OUPPI students, faculty, and staff engage with local industry at events like Tech Tuesdays, Polytechnic Preview Day, and the Colloquium Series.

“I love OUPPI because of the community. The faculty has made it a point to connect students with local industry partners, helping us build a community that reaches beyond the classroom. As students, we keep finding new ways to laugh, collaborate, and grow together.”

— Sanaa Byron, Cybersecurity, Class of 2026

THINGS TO KNOW

1 GET YOUR HANDS DIRTY (IN A GOOD WAY!)

Forget lectures-only. Every class at OUPI is in-person and packed with projects. You'll work in teams, solve real problems, and learn by actually doing—just like you will on the job.

2 MEET THE PROS. BE ONE SOON.

Want to know what it's really like in the tech world? You'll find out through job shadowing, internships, and a weekly speaker series where industry leaders from across Oklahoma share their journeys and what's happening now in the field.

3 FIND YOUR PEOPLE. BUILD WHAT'S NEXT.

At OUPI, you're part of something bigger. You'll be surrounded by professors, mentors, and classmates who want you to succeed. This is a place where you can bring your ideas to life and work alongside people who share your drive. Join OPAL and take the first step toward building your future. You will make connections that last long after graduation. Here, you'll find your people and start building what's next—together.

Cybersecurity students demonstrate a class project to OU Regent Waits during a visit to OUPI's Intro to Linux course on the Tulsa campus.
