

FALL 2019 OU PRESIDENTIAL DREAM COURSE PUBLIC LECTURE

Archaeology and the cyborg chimaera

Loukas Barton
Dudek

4:00pm, December 3rd
JJ Rhyne Community Room, Zarrow

Dr. Barton is an archaeologist with interests in the cultural, ecological and evolutionary factors that lead to behavioral, technological and social change across human populations. More specifically, he studies the transition to agriculture in East Asia, resource intensification in southwest Alaska, the late Pleistocene peopling of Eurasia, and the relationship between environmental change and cultural evolution.
