

# SUSTAINABLE ENERGY SYSTEMS PROGRAM

*The UNIVERSITY of OKLAHOMA*

## ADVANCE YOUR CAREER IN SUSTAINABLE ENERGY

**15 CREDIT HOURS**  
**2 CORE SES COURSES**  
**+ 3 SES ELECTIVES**

**SES 5113 Evaluation of Sustainable Energy Systems**

**SES 5121 Seminar in Sustainable Energy Systems**

**Over 50 SES electives to choose from!**

## 5 THINGS YOU SHOULD KNOW

### **1 Why? Position yourself at the forefront of the global energy transformation**

This certificate was created so all students could gain broad knowledge about energy, the carbon cycle, climate change, sustainability, and the social and economic impacts of energy. Apply what you learn to your academic area(s) of interest.

### **2 Who is the SES certificate open to? Every Major. Every College.**

Your expertise + energy knowledge = career advantage!

### **3 Will this make me competitive in the job market? Absolutely!**

This is no longer optional. Energy and sustainability knowledge is becoming essential in every field. This certificate gives you the future-ready skills to lead and adapt in a world reshaped by climate and energy challenges.

### **4 When are the core SES courses offered? Start any semester!**

Flexible scheduling for busy graduate students.

### **5 Can SES courses double-count for degree requirements? Maximize your time!**

Courses count towards your degree AND certificate!

**Your degree + energy expertise = unlimited opportunities**
