

Professional Development Opportunities with the University of Oklahoma

Team,

To support your continued professional development, I want to share some excellent training opportunities offered by the University of Oklahoma's Energy Programs. These courses are highly regarded in the industry and provide practical, valuable skills.

The upcoming programs include:

- Blowout Prevention School (BOPS): For foundational safety and operations.
 - University of Oklahoma Main Campus, Norman, OK
 - Monthly Offerings
- Gas Compressor Short Course: For optimizing system performance.
 - North University Park, Norman, OK
 - Annually Occurring ~ August
- Corrosion Control Course: For ensuring asset and pipeline integrity.
 - North University Park, Norman, OK
 - Annually Occurring ~ June
- Laurence Reid Gas Conditioning Conference (LRGCC): For high-level engineering and gas processing technology.
 - North University Park, Norman, OK
 - Annually Occurring ~ February
 - Abstracts due annually ~ June-August

Please take a look at the attached brochures and let me know if you are interested in attending any of these programs. Investing in your skills is an investment in our company's success.

Best,
[Manager's Name]
