

Healthcare Administration Certificate

For OU in-person MBA students | Hudson College of Public Health

Build your understanding of health care while you complete your MBA. Learn how health care organizations operate, how they are paid, and how quality, policy, and technology shape management decisions.

A collaboration between OU's Price College of Business and Hudson College of Public Health, this certificate connects your business training to interests in hospital management, health insurance, consulting, or health technology.

12

credit hours

4

courses

1 + 3

core course + 3 electives

Certificate requirements

Core course • 3 credit hours

HAP 5453 US Health Care System. Study the organization and financing of the U.S. health care system and the relationships among its institutions.

Elective courses • 9 credit hours

Choose three electives that match your interests. Courses recommended for MBA students are listed below.

Learning options

Take courses in person at Hudson College of Public Health or through asynchronous online study.

Some courses are taught by experts in the field at their practice locations, such as the Oklahoma State Capitol and OU Health Hospital.

Get started

All current OU in-person MBA students are eligible. A separate certificate application is required, with no additional admission requirements.

Recommended electives

Each course has 3 credit hours. Choose three to complete the 9-credit elective requirement.

Course	Course name	What you will study
HAP 5733	Managed Care and Integrated Delivery Systems	Explore health insurance, reimbursement models, managed care, and how integrated delivery systems organize and pay for care.
HAP 5653	Healthcare Operations Management	Study the daily operations of health care organizations and the decisions managers make to support care delivery.
HAP 5883	Health Care Quality Management	Learn how to measure care quality and use quality improvement models to improve patient care and safety.
HAP 5873	Health Information Systems	Examine health information technologies and their adoption, with attention to how information supports management decisions.
HAP 5303	Health Policy and Politics	Study health policy and politics. In-person offerings at the Oklahoma State Capitol let you see policymaking in action.
HAP 5483	Healthcare Law and Ethics	Examine hospital policies, health care laws and regulations, and ethical issues in health care management.
HAP 5563	Human Resources Management	Study workforce management in health care. Recommended for students interested in health care human resources.

These courses are preferred choices within a broader list of certificate electives. For other options and current course offerings, formats, and locations:
